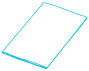
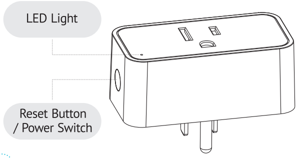
SP3 Smart Plug



User Manual

1. For safety, always turn off your power breaker before installation.
2. For indoor use only.
3. Whenever you change the Wi-Fi network, re-connection is required.
4. Do not plug in and out the device repeatedly. Always wait for an interval of 10 seconds.

PRODUCT OVERVIEW



1 LED Light :

LED light on	SP3 Smart Plug is turned on
LED light off	SP3 Smart Plug is turned off
LED light is blinking fast (about 3 times per second)	SP3 Smart Plug is in EZ mode and wait for pairing
LED light is blinking slowly (about once in every 2 seconds)	SP3 Smart Plug is in AP mode and wait for pairing

NOTE If you are connecting SP3 Smart Plug for the first time, the LED light will stay solid before you reset it. You must connect SP3 Smart Plug to the LaView APP before you can use it.

2 Reset Button / Power Switch:

Press and hold the reset button for 5 seconds to reset SP3 Smart Plug, or press once to turn on/off the SP3 Smart Plug manually.

2 Complete the app registration process.

LaView

GET IT ON Google Play

Download on the App Store

TIPS Scan the QR Code below and download LaView APP

APP SET UP

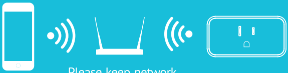
1 **Download and install LaView APP.**

LaView APP is available for both iOS and Android OS. Search the name 'LaView' in App Store or Google Play. (The other LaView APPs, such as LaView Connect, LaView ONE, LaView Life do not support SP3 Smart Plug)

3 Connect your phone to a 2.4 GHz Wi-Fi network. SP3 Smart Plug supports 2.4 GHz frequency's only. Please select an appropriate 2.4 GHz network before Wi-Fi configuration.

4 Plug in your SP3 Smart Plug into the wall outlet.

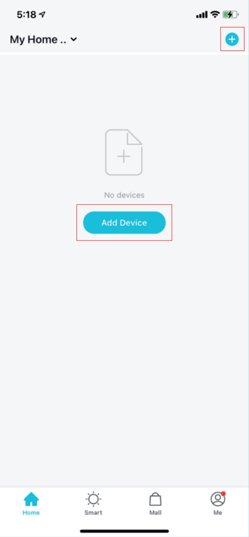
5 Ensure your mobile device, router and SP3 Smart Plug are as close as possible. You can move the device after the connection is successful.



Please keep network available

6 Hold down the reset button for 5 seconds until the LED light is blinking, now your SP3 Smart Plug is ready for pairing.

7 Open the LaView APP. Click the blue plus icon (on the top right corner in 'Home') or 'Add Device'.

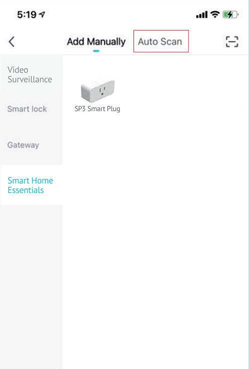


Option 1
Connect SP3 Smart Plug by Auto Scan Feature

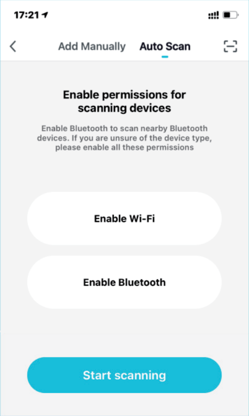
3 The Auto Scan feature will scan your local network for searching devices. You will also need to have a 2.4

① Ensure the LED light of your SP3 Smart Plug is blinking, if not, hold down the reset button for 5 seconds until the LED light starts blinking.

② Select 'Auto Scan'.



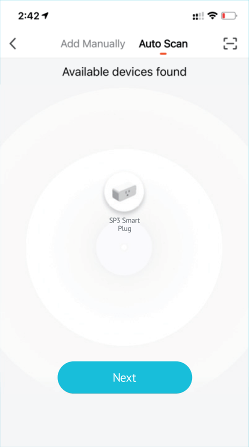
GHz Wi-Fi network selected and Bluetooth enabled.



Enable permissions for scanning devices

Enable Bluetooth to scan nearby Bluetooth devices. If you are unsure of the device type, please enable all these permissions

④ Select SP3 Smart Plug icon and follow up the in-app instructions to finish the setup process.



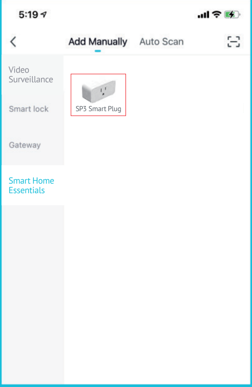
Available devices found

Option 2

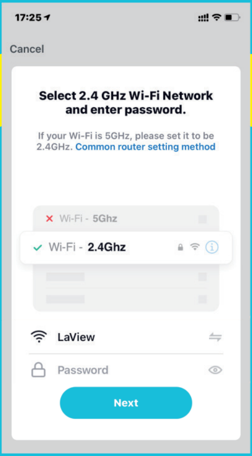
Connect SP3 Smart Plug Manually

① Ensure the LED light of your SP3 Smart Plug is blinking, if not, hold down the reset button for 5 seconds.

② Select 'SP3 Smart Plug' in 'Smart Home Essentials'.



③ Select a 2.4 GHz Wi-Fi Network and input the Wi-Fi password.



17:25

Cancel

Select 2.4 GHz Wi-Fi Network and enter password.

If your Wi-Fi is 5GHz, please set it to be 2.4GHz. Common router setting method

✗ Wi-Fi - 5Ghz

✓ Wi-Fi - **2.4Ghz**

Maximum Power	1875W
Size	74 x 37 x 31 mm
Smart Home Integration	Amazon Alexa and Google Assistant

GROUNDING INSTRUCTIONS

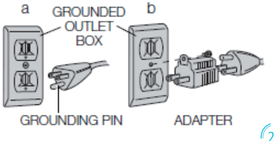
In the event of malfunction or breakdown, grounding provides a path of least resistance for electric current to reduce the Risk of electric shock. The plug must be connected to a cord having an equipment-grounding conductor and a grounding plug. The plug must be plugged into an appropriate outlet that is properly installed and grounded in accordance with all local codes and ordinances.

⚠ **DANGER:** Improper connection of the equipment grounding conductor can result in a risk of electric shock. The conductor with insulation having an outer surface that is green with or without yellow stripes is the equipment grounding conductor. If repair or replacement of the cord or plug is necessary, do not connect the equipment grounding conductor to live terminal. Check with a qualified electrician or service person if the grounding instructions are not completely understood, or if in doubt as to whether the plug is properly grounded.

Do not modify the plug connected to the plug- if it will not fit the outlet, have a proper outlet installed by a qualified electrician.

FOR GROUNDED, CORD-CONNECTED PLUG RATED LESS THAN 15A AND INTENDED FOR USE ON A NOMINAL 125V SUPPLY CIRCUIT

The plug is for use on a nominal 125V circuit and should be connected to a grounding outlet that looks like that illustrated in sketch a. A temporary adaptor, which looks like the adaptor illustrated in sketch b, may be used to connect this plug to a 2-pole receptacle as shown in sketch b if a properly grounded outlet is not available. The temporary adaptor should be used only until a properly grounded outlet can be installed by a qualified electrician. The green colored rigid ear, lug, and the like, extending from the adaptor must be connected to a permanent ground such as a properly grounded outlet box cover. Whenever the adaptor is used, it must be held in place by the metal screw.



NOTE:

IN CANADA THE USE OF A TEMPORARY ADAPTOR IS NOT PERMITTED BY THE CANADIAN ELECTRICAL CODE.

Ensure that the timer is connected to an outlet having the same configuration as the plug.

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio / TV tec

FCC Compliance

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- hnician for help

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: The manufacturer is not responsible for any radio or TV interference caused by unauthorized modifications to this equipment. Such modifications could void the user's authority to operate the equipment.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference, and

(2) This device must accept any interference received, including interference that may cause undesired operation

RF Exposure Warning Statements:

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator & your body.
