Microphone audio cable

## Connect to the Podcast Console

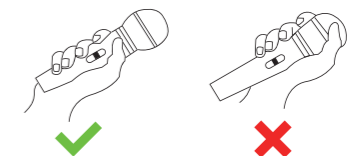

## Connect to the Speaker

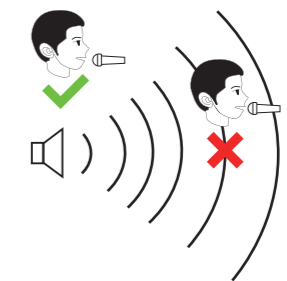

## Notes

If the microphone head is covered by hand or the microphone is approached to the speaker a howling sound may be generated. This phenomenon of howling is caused by the microphone picking up the sound output from the speaker. To prevent this problem, first decrease the volume of the speaker, do not place the microphone pointed to the speaker and keep a sufficient distance between the microphone and speaker.

\* The microphone is a sensitive equipment, do not drop, hit or apply shock to it.  
\* Do not store the microphone in a place with high temperature or humidity.

hold microphone handle not grille

Avoid feedback howling
