Insert the
SD card

Cover the
back cover

Please format the SD card on computer before inserting.

Indicator light:

If blue light stays on, the camera is connected to wifi.

If blue light flashes, the camera is not connected to wifi.

If red light stays on, the sd card is recognized.

If red light flashes, the sd card is not recognized.

How do I download the APP?

Method 1 :

Enter the APP store of your Phone
search for "**CAMDUCK**" and download the APP

Method 2 :

Scan it to Download app

Note: This camera doesn't support login web page or computer

When using the App, Please allow "CAMDUCK" APP access to location/notification/local network for the APP to work properly.

How to save the recorded video?

If you have inserted sd card into camera, the recorded video will automatically be saved in sd card.

(maximum support 128G; the micro sd card is not included with this product)

- * Please select a high-speed memory card;
- * The product cannot save recorded video without a memory card.
- * In loop recording mode, the camera automatically save a video per 10 minutes.

In motion detection mode, the camera records a 2 minutes video after motion detected.

How do I start up the camera ?

Plug the camera in outlet, and it will start up.

8 seconds after the power is connected, the blue and red indicator light will both be on or flash, and the camera will start up.

After 1 minute, the red and blue indicators will go out and the product will automatically enter recording mode.

In the case of inserting a memory card, the red indicator will stay on and go out after 1 minute.

In the absence of a memory card, the red indicator light will flash for 1 minute and then go out.
