- The lamp beads inside the device is not replaceable.
- Install only by certified electrician.
- Unable to change the mode or scene by voice.

# How to Install

## Diagram Instruction

## Connect to Smart Life APP

**Note:**

Before connect to Smart Life app, please make sure your smart phone and the ceiling light both are connected with the same 2.4GHz wifi, not 5GHz.

### Download and install the app Smart Life

Scan the QR code below with your mobile phone or search "Smart Life" in the App Store to download and install the app.

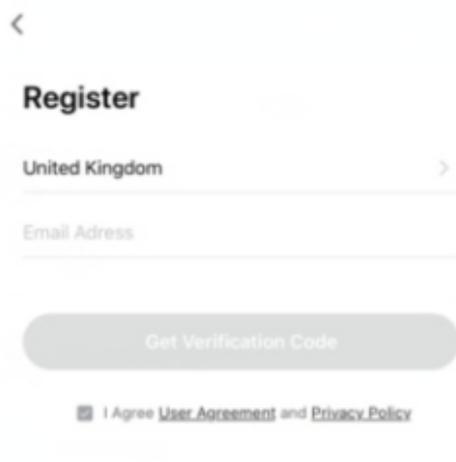

## Register / Log In

Registration: Before using for the first time, please use the following tips to register your account.

( Email or phone number)

If you already have an account, enter your account and password to log in directly.

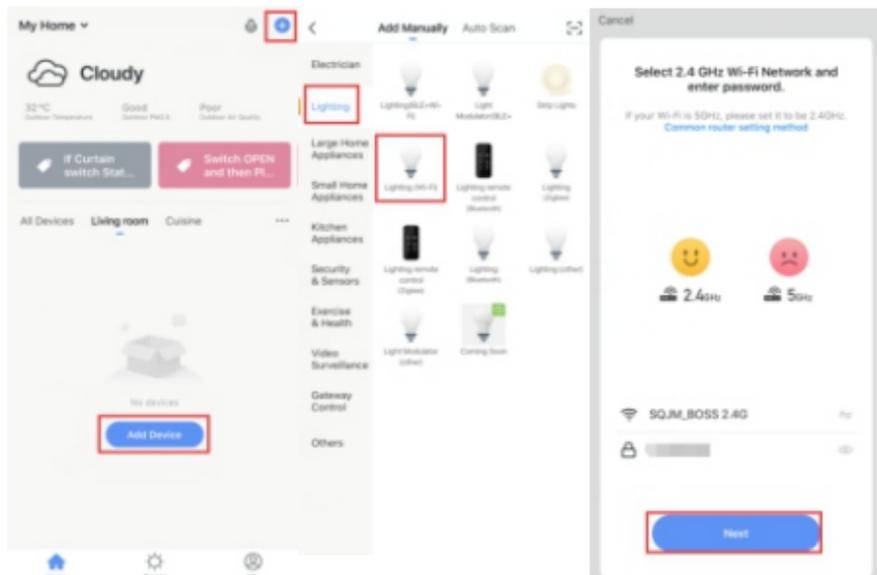

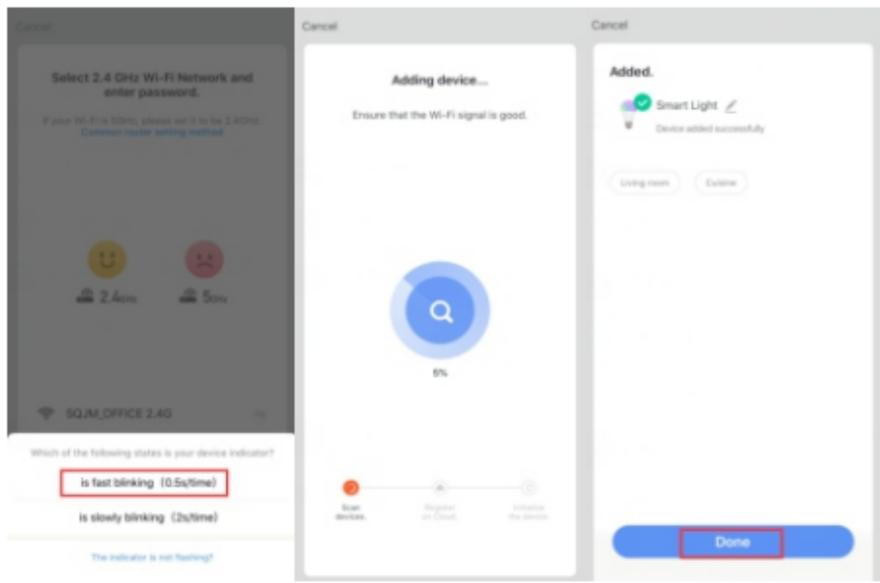

The screenshot shows a mobile registration interface. At the top left is a back arrow. Below it is the title "Register". There are two input fields: the first is labeled "United Kingdom" with a right-pointing chevron, and the second is labeled "Email Adress". Below these fields is a large, rounded rectangular button with the text "Get Verification Code". At the bottom, there is a checkbox followed by the text "I Agree [User Agreement](#) and [Privacy Policy](#)".

## Add Device - EZ Mode(Flash mode)

Click "+" on the top right of the main page to go to the next page and then select "Lighting" -"Lighting(Wi-Fi)".

In EZ mode(Flash mode) , make sure that the white light of the device flashes quickly (0.5s/time) and then enter your 2.4G WIFI Password.

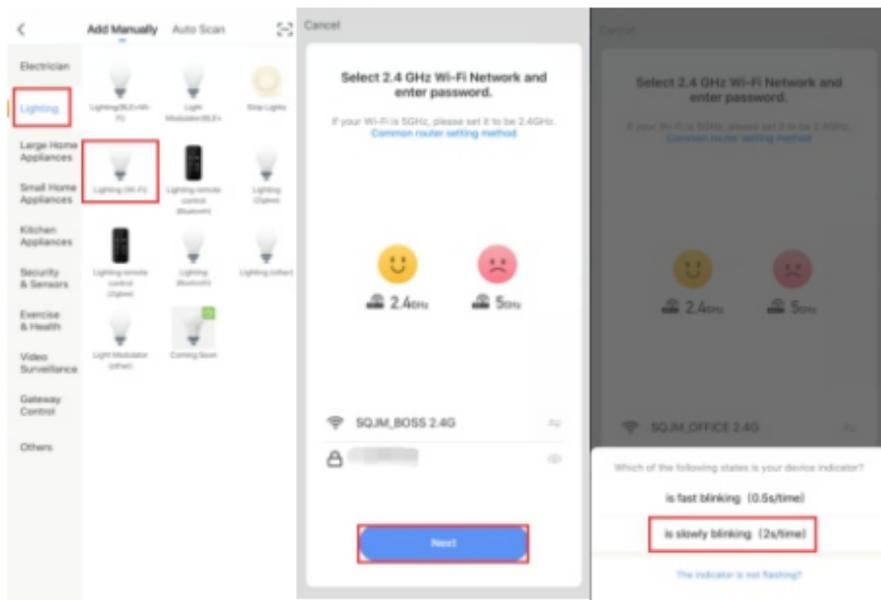

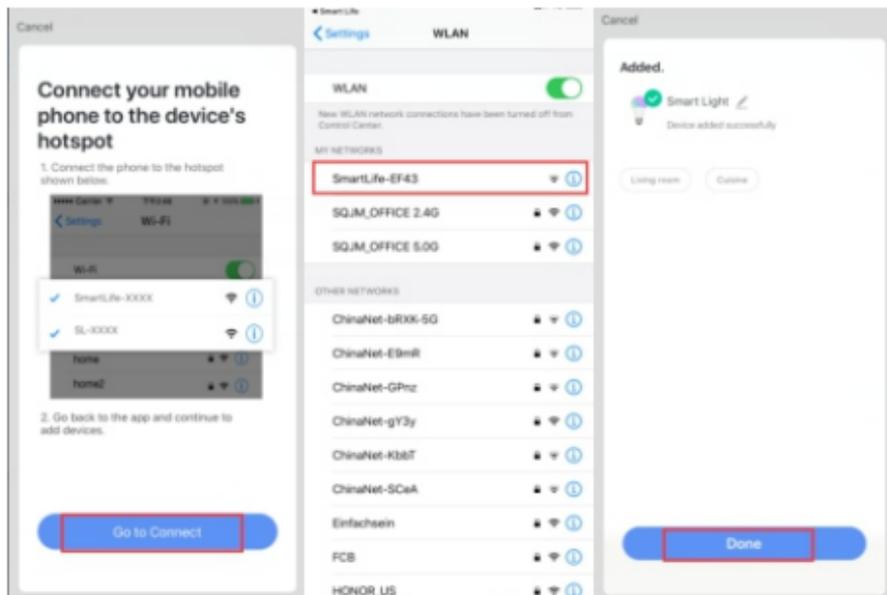

### Note:

1. If it doesn't flash quickly, please turn on and turn off it for 3 times (on-off-on-off-on) until the light flashes quickly in white (please ensure there is 1-2s interval between turn on and turn off, just in case the ceiling lights doesn't blink). If it still doesn't flash quickly, please try the steps above again.
2. If adding the device fails several times in normal mode, then please try AP mode (Slow Flash Mode)

## Add Device - AP Mode(Slow Flash Mode)

1. Click "+" on the top right of the main page to go to the next page and then select "Lighting" - "Lighting(Wi-Fi)".
2. In AP mode, then enter your 2.4G wifi, and make sure the device's white light is blinking slowly(2s/time), then go to connect the hotspot named "SmartLife-XXXX" and back to smart life APP.

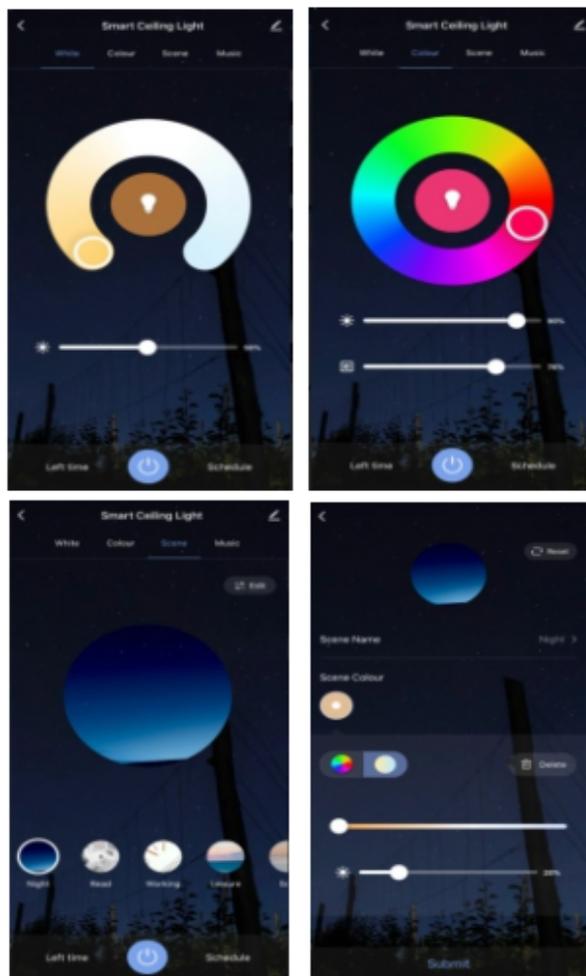

**Note:**

If it doesn't flash slowly, please turn on and turn off it for 3 times (on-off-on-off-on), until the light flashes slowly in white. If it still doesn't flash slowly, please try the steps above again (please ensure there is 1-2s interval between turn on and turn off, just in case the ceiling lights doesn't blink).

# APP Control

Device Control / White Light / Colour / Scene / DIY  
Scene / Schedule

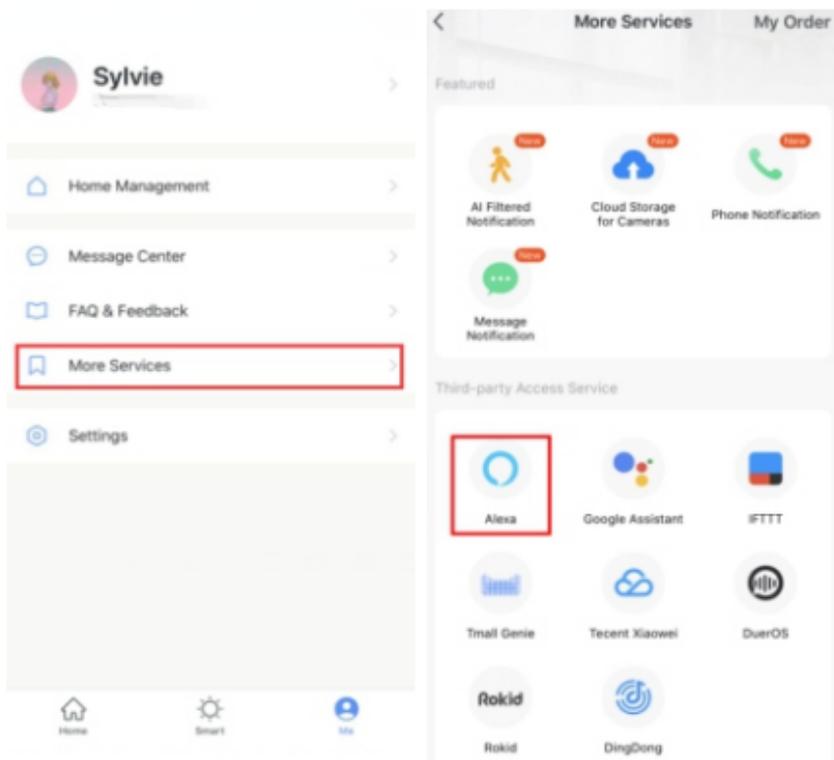

# Connect Your Device to Alexa

If you have activated the Smart Life skill in Alexa, you can directly say "alexa, discover device"

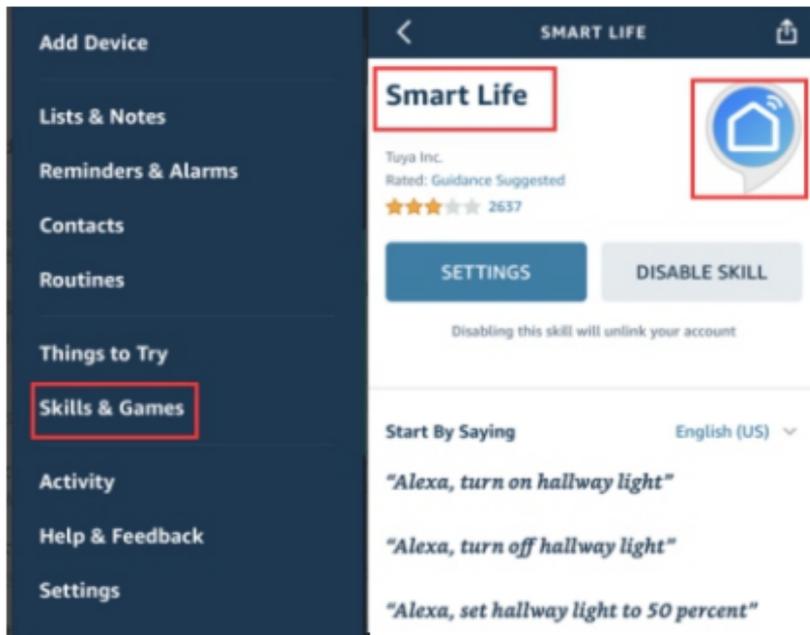

**Note:**

If you change the device name in Smart Life app, Alexa needs to rediscover the device.

If you haven't activated the Smart Life skill, you can directly sign in your Alexa account from Smart Life app to link in.

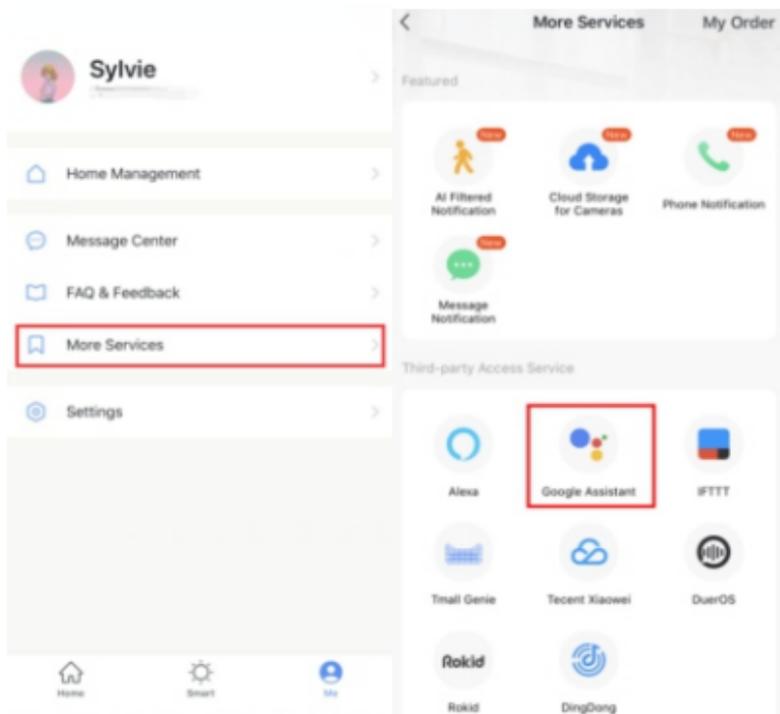

Or you can sign in your Alexa app, then find the Smart Life app to activate.

## Connect Your Device to Google Home

If you already have a Google assistant account, you can directly sign in your account from Smart Life app to link in.

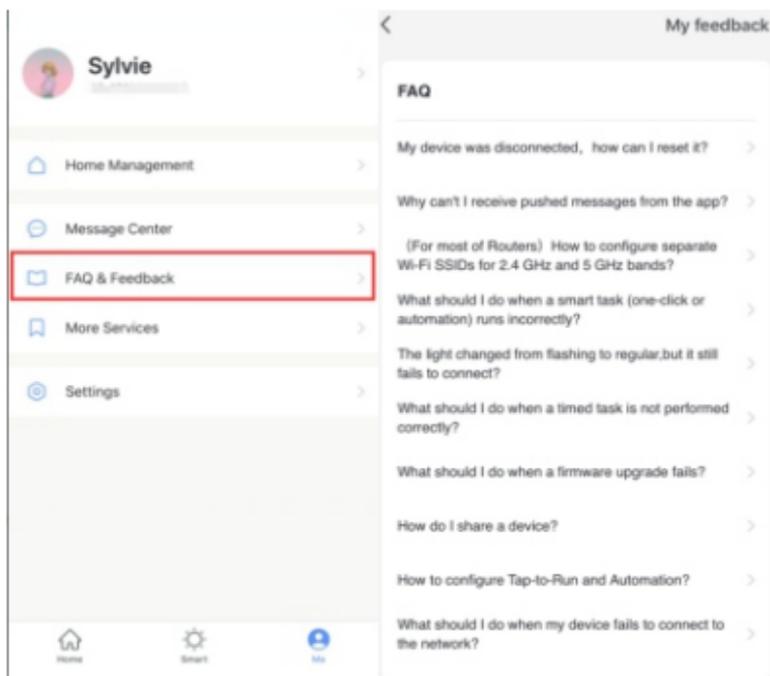

# FAQ

## 1. How to reset the smart ceiling light?

Please turn on and turn off it for 3 times (on-off-on-off-on), till it flashes quickly in white (please ensure there is 1-2s interval between turn on and turn off, just in case the ceiling lights doesn't blink).
