

# Back Buttons Programming

Fn=F1/F2, (F1=L2、F2=R2) by default

Setting Modes	Description	E. g
Programming setting	F1& F2 are the two programming buttons. 1. Press and hold SHARE + Fn key (any key of F1-F2) until the light bar flashes to enter into programming mode.2. Press the F1/F2 and any button that you want to assign to, the light bar stays on, you've successfully complete the programming setting.	1. In programming mode, press the  key, then press the F1 key, the light is on, you can use the F1 to replace the  key. 2. In the programming mode, if no operation over 10 seconds, the programming mode will be turned off.
Clear programming	When the bluetooth is turned on, press and hold the SHARE+ Fn until the lightbar flashes to turn off the programming setting, Fn keys are back to default setting (F1=L2、F2=R2)	
Cancel programming	When the controller is connecting to the system, press and hold the Option+Turbo until the lighter flashes and stays on. It stops the programming setting, no any programming keys working. Press Option+ Turbo key combination once more, it reactivate programming setting to be default mode.	
Programming memory	The programming settings will remain when you turn off your controller.	
Programmable button	The following buttons can be programmed:  ,  ,  ,  ,  (Up),  (Down),  (Left),  (Right), L3, R3, L1, R1, L2, R2	

# Vibration Setting

---

If your controller is not vibrating as expected, the controller's vibration function may be turned off. To turn it back on:

Go to Settings > Devices > Controllers > Enable Vibration.

# Audio Setting

---

If you have headphones plugged into the 3.5mm headphone jack on the controller and you hear no audio, or the audio from the headphones is very faint, make sure the headphone plug is pushed all the way in. Unplug and then firmly reinsert the headphones.

To route all audio output to headphones:

1. Go to Settings > Devices > Audio Devices.
2. Select Output to Headphones > All Audio.

Highlight the Volume Control (Headphones) option and press Right on the 'D-pad' to make sure the controller's volume is turned up.

If output to Headphones is greyed out, that means the headphones are not detected by the controller.

# How to Reset

---

If your controller won't pair, won't respond, or is displaying a flashing light, please follow the instructions on how to reset the controller.

1. Turn off and unplug your Console.
2. Locate the small reset button on the back of the controller near the shoulder button.
3. Use a small, unfolded paper-clip or small tools to push the button (the button is inside a tiny hole).  
Hold the button down for a few seconds and release.
4. This will prompt the controller to resync.
