Specification

Dimensions (L x W x H): 87 x 14 x 18mm

Battery Capacity: 400mAh

Constant Voltage: 3.4V

Resistance: > 1.0 ohm

Charging Time: About 2h

How To Use The FLEAP

1. Power On/Off

Built-in draw activated system, just vape to turn on the Fleap, the indicator light will turn blue.

2. Battery Charging

When the battery level is below 3.2V, the blue indicator light will continue to flash 10 times to indicate that the battery needs to be recharged. The blue light stays bright when charging the Fleap and it will be off when fully charged.

3. Protection Function

Overcharge protection: The charging process will be terminated when Fleap is fully charged.

Short-circuit protection: When a short circuit is detected, the blue indicator light will be off after staying bright for 2 seconds then the Fleap will stop working immediately.

Low-battery protection: When the battery level is lower than 3.2V, the blue indicator light will flash 10 times continuously to remind that battery needs to be charged. You can't vape when in low-battery protection mode.

Attention

The device must be charged for at least 2 hours before using for the first time.

Warnings and Precautions

- Check the legal smoking age in your jurisdiction.
- Keep your Fleap and its components away from children, pregnant women and pets.
- Do not disassemble or tamper with your Fleap. Any inappropriate, incorrect, or irresponsible use will void any warranty and may result in injury.
- Do not use your Fleap if it is unusually hot to the touch.
- Do not store your Fleap or any of its components in or near heat sources.
- Do not use your Fleap if it becomes immersed in any liquid.
