FAQ

1 How long does the battery take to be fully charged.

It takes 2-3 days to be fully charged.

2 How does the camera store videos

The camera support cloud storage and local TF Card storage.

You can insert a maximum 128GB TF card, once the storage is full, it will automatically overwrite.

You have 1 month free trial cloud storage, after 1 month, you need to pay for cloud storage.

3 What to do when forget the password

Reset the camera to factory setting and reconnect the camera to your phone and set a new password.

4 Why the camera says offline on app

1 check if the camera light is blue, if there is no light, please turn off the switch of solar power and turn on again to see if the light is blue, if still no light, pls charge the solar panel.

2 if the camera light is blue, pls press the reset button of the camera,(the reset button on the back of camera take off the screws, you will see the reset button) and then connect the camera to phone.
