

LEVELING LIFT KITS

1994-2001 Ram 1500, 1994-2013 Ram 2500, 1994-2012 Ram 3500 Front Leveling Kit Installation Instruction

- Please remember to double check all fittings for tightness before operating vehicle.
- It is always recommended to have a kit installed at a professional shop to ensure fitment and clearances. It is also recommended to have an alignment performed within 300 miles to ensure good wear on your suspension and tires.
- Easy Installation: It will take about 2-4 hours to install.
- Note: Installation will not destroy any parts of the original vehicle, just add leveling lift parts.
- When installing the bolt, you need to hit it with a hammer to make it solider and not fall off.

Step 1

Step 2

Step 3

Installation Procedure

- 1、 Raise the vehicle and support the frame with jack stands.
- 2、 Remove the front wheels.
- 3、 Disconnect the sway bar.

- 4、 Unbolts the ABS/Brake line bracket from the axle.

- 5、 From the engine bay, removed the upper shock nuts in bushings.

- 6、 Back the truck and remove the mounting nuts.

- 7、 Put out the lower shock mounting nuts and able to bolt out.

- 8、 Jack at the lower control arm and raise up a little then pull the shock out and remove it completely from the truck.

9、 Pull out the coil spring in upper isolator.

10、 Install KSP leveling kits in the upper spring mount. You can hold it in place with the supplied nuts.

11、 Reinstall the coil spring between the axle and the leveling kits.

12、 Bring that truck back down to load up the suspension.

13、 Slide the shock back into the engine bay.

14、 Reinstall the lower shock bolts and run the nuts down to on 100 foot-pounds.

15、 Attach the shock tower to the leveling kit studs.

16、 Back in the engine bay, reinstall the upper shock bushing and nuts. Tighten the nuts down to 40 foot-pounds.

17、 Connect the sway bar to its link and tighten the nut down to 27 foot-pounds. And then reattach brake line bracket and ABS.

18、 Reinstall the wheels.

19、 It is always recommended to alignment.
