1. Important Safety Information

Please read all safety information before use.

⚠️ **WARNING**

Do not ingest battery.

Do not expose the device to a direct heat source.

Do not expose the device to any mechanical stress or impact.

Do not attempt to disassemble your Coredy item finder.

Don't use a damaged Coredy item finder.

CHOKING HAZARD

Coredy item finder, the battery compartment door, the screw, and the battery may present a choking hazard or cause other injury to small children, keep these items away from small children.

BATTERY

This device contains a replaceable coin cell battery, which will last up to 1-year, and the battery might to be replaced during the life of the product, replace only with the same type (CR2032) and rating of battery, note the correct polarity.

Important: Contact your local waste management authority for battery disposal regulations in your area. Keep batteries away from children, if the coin battery is swallowed and ingested, it can cause severe internal burns within two hours and result in serious injury or even death. Seeking medical attention immediately if you think batteries might have been swallowed or placed inside any part of the body. If the battery compartment does not close securely, stop using the product, and keep away from children.

FCC Warning

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications.
However, there is no guarantee that interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

-- Reorient or relocate the receiving antenna.

-- Increase the separation between the equipment and receiver.

-- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

-- Consult the dealer or an experienced radio/TV technician for help.

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.
