BRIEF

# Features

Everbloom is a modular-designed garden bed system with eco-friendly material for sustainable urban gardening and farming.

The galvanized steel brackets are powder-coated to provide strength for indoor and outdoor conditions. The composite boards are made of genuine wood and plastic powder, lasting for up to 10 years in outdoor systems. The elegant black and brown color is fitting to all types of gardening projects.

Assembly is quick and easy with our Groove Lock structure; No complex tools required. A rubber mallet is the only added tool you may need to construct an EverBloom bed.

Thanks to our joiner and board designs, Everbloom systems can be created in virtually any length and size: Straight in-line, L-shaped, U-shaped, T-shaped, and cross-shaped are a few of the many possibilities. Additionally, we have created add-on utility shelves and swivel caster wheels for ultimate versatility. Everbloom offers the most durable and adaptable garden bed system on the market, while presenting an elegant choice of contemporary style for premium garden lovers.
