① Red for 12-32V Power — Red
② Black for Ground — Black
③ Trigger Line — Green

Power Cable Connect To the Screen

Use Video Cable to Connect the Camera

CH2 (AHD2 Signal)

CH1 (AHD1 Signal)

Use Video Cable to Connect the Second Camera

CH2 Camera is Displayed by Default

Press "CH-" to Switch to the CH1 Camera

* If you connect the camera to CH1 but you don't see the picture (no signal), press "CH-" to switch the camera. (Because the system displays the CH2 camera by default.)
* The system will remember your settings and no need to set it again next time you use. But the settings of each camera are not universal. (when you connect two cameras)

Installation Guide

A: Want camera working when in reversing only
