Solarparts-L-F-Series

Solarparts-L-F-Series

high-efficiency cell
flexible PV module

Features

【Extremely Flexible】

This flexible solar panel is capable of meeting a wide range of applications where standard panels can be inconvenient to mount, such as on the curved roof of an airstream.

【Ultra Thin】

Hardly noticeable, the Solarparts-F-L flexible solar panel is approximately 95% thinner than its rigid counterpart, this panel is ideal for a stealthy solar setup.

【Potential Uses】

The flexible solar panel can be primarily used on off-grid applications that include marine, rooftop, RV, boats and any curvy surfaces.

【Ultra Light】

Thanks to advanced polymer materials, these flexible solar panels weigh 70% less than conventional solar panels, making transportation and installation a breeze.

【Reliable and Durable】

This solar panel accomplishes with IP67 rated waterproof junction box and solar connectors. Withstand up to 5400 Pa of heavy snow load and up to 2400 Pa of high wind.

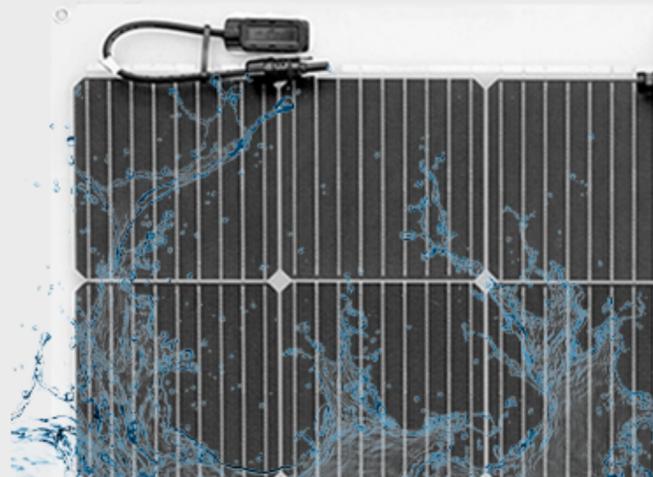

Long lasting and stable quality

- Through various long-term reliability tests.
- ISO 9001, ISO 14001 and BSCI, CE, ROHS, REACH
- The reliability of components is effectively ensured under EL test before and after lamination.
- Fully automatic production line and the leading photovoltaic technology.

Intensity–Electrical performance diagram

Attention 1、 Not contact with strongly corrosive substances..Neutral silicone adhesives are not corrosive to products.

Use and storage 1、 Storage conditions: Normal temperature, dry and ventilated place

2、 Use in outdoor environment without shielding under the sun
3、 Dust and water proof grade of solar panel: IP65
