

Ducati Motorcycle Gear Indicator Red Color

This gear indicator works for ducati scrambler 400, ducati 848, monster 696, monster 821, monster 797, monster 796, ducati 1098, 1198, 1200S 821 659 1100

How to install Ducati motorcycle gear indicator on a bike?

- ✓ Find the red color 4 poles male diagnostic connector, it is usually near the ECU box. Maybe it is one removable cap and partially covered by black tape.
- ✓ Connect the red cable to the positive, and the green cable to RPM signal. They are important cables for making your bike work with this gear display.

After the installation, you need set it up as below.

- ✓ Set your motorcycle rear wheel on the stand frame, turn on the key, the gear indicator is flashing with the letter L. It means it is learning now.
- ✓ Start your engine, the letter L will flash to number 1, now you need to change gear to 1.
- ✓ In the same way, you set gear 2,3,4,5,6, please remember you need to control the tachometer with your right handlebar throttle, the gear position should compatible with your normal RPM.
- ✓ Re-start your engine now, you can see gear number 0,1,2,3,4,5,6
