A: Use of Limit Comb: Cropped hair and hair trim Feature:
(3,6,10,13,16,19,22,35mm) eight lengths adjustment, control the hair length

1. To determine the length of haircut
2. To select the appropriate limit comb

3. To fine-tune the cutter
Adjust the cutter by rotating the adjusting ring from forward to downward

FIXED-LENGTH FUNCTION

- B: Mount the limit comb:
1. Align the limit comb with the blade edge
 2. Slightly forward push to mount it.

- C: Disassemble the limit comb:
Just pull hard the limit comb

CUTTER ASSEMBLY AND DISASSEMBLY

Sketch shows how the bottom blade holes are larger than the shanks of the blades screws. When the blade screws are loosened the bottom blade can be aligned with tight after the blade is aligned.

1. End of the top blade teeth should be 1/32" to 1/16", 0.79mm to 1.59mm back from bottom blade. This is important so that the clipper doesn't cut too close or allow the moving cutter to touch the skin.
2. Extreme left hand tooth of top blade must be covering or be to the left of the first small tooth of bottom blade.
3. Extreme right hand tooth of top blade must be touching the big tooth on the bottom blade.

Taper Lever

Some clippers are equipped with an adjustable taper lever that changes the closeness of your cut. When the lever is in the uppermost position, the blades will give the closest cut. Pushing the lever downward gradually increases the cutting length.

CUTTER ASSEMBLY AND DISASSEMBLY

Blade Alignment

- Your clippers were carefully examined to ensure that the blades were oiled and aligned before leaving our factory.
- Blades must be realigned if they have been removed for cleaning or replacement
- To realign the blades, simply match the upper and bottom blades teeth up, point for point. (End of top blade teeth should be approximately 0.5- 1.0mm back from bottom blade. Compare your clipper blades with the sketch)
- If blade alignment is incorrect, add a few drops of oil to the blade, turn clipper on for a few moments, turn off and unplug. Loosen screws slightly and adjust. Tighten screws after blade is aligned

Cutter Maintenance

- To maintain your clipper in peak condition, the blades should be oiled every few haircuts.
- To oil it properly, the unit should be held so the blades are in a downward position. With the clipper blade running, dispense 2-3 drops of oil across the top blade.

PRECAUTIONS FOR USE

1. Please do not disassemble the product.

2. The hair clipper can not be washed. Please keep it away from wet conditions.

3. The product can only be cleaned by cloth with little water or mild soap solution.

4. Do not charge the product under environment above 40°C or below 0°C.

The product can produce little heat during using or charging, which is normal.

Please remove the battery safely and return it to the specified places when the battery runs out. Never discard it casually.
