 Nakamichi®

Etsuro Nakamichi founded Nakamichi Research in 1948. The brother of Niro Nakamichi, he was an acoustic engineering officer in the Japanese Navy doing sonar research.

The company he founded initially designed and developed portable radios, tone arms, speakers and communications equipment, and provided R&D for major brands, government entities, universities, and organizations in the private sector.

Since then, Nakamichi has contributed to various innovations in technology, such as the compact disc and similar optical memory systems, paving the way for an entire range of high-end consumer electronics.

Today, Nakamichi prides itself on relentless research and development, while delivering some of the world's best products to people who appreciate sound at its highest quality.

Nakamichi's first
 HiRes certified DSP series.

6 Hi-Level input

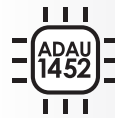

NOST500A
 Professional Audio DSP Processor

Hi-Res Audio (HRA) is lossless audio capable of reproducing the full range of sound from recordings that have been mastered from better-than-CD quality music sources.

BUILT IN AMPLIFIER

Built in amplifier let's you save space by avoiding installing a separate amplifier within your vehicle. Simply connect your speakers directly to the DSP.

Utilizing the latest Analog Devices chipset, ADAU1452, code and processing efficiency is vastly improved while reducing power consumption.
