STEP 5

Pull the leg covers tight and attach the metal hooks into the tube holes near the feet. If the cover becomes loose, tighten by moving the hook to a lower hole. Then secure the tent with Ropes and the Stakes. We recommend the stakes are at a <u>45 degree</u> angle into the ground facing away the tent to ensure maximum tension.

STEP 6

Hang the side panels to the Poles by Velcro Ties. All side panels can be hung or taken off separately.
