

# LAMPAOUS® RGB LED Pool Lights Operation

---

LAMPAOUS® PL-M120/PL-M12/SPL-M120/SPL-M12

LAMPAOUS® Replacement Multi-Color LED In-ground Pool Bulb Use the pool's current on/off light switch to control the light shows of the new bulb.

## Solid Colors

Your LAMPAOUS® Replacement Multi-Color LED In-ground Pool Bulb has seven solid colors available for you to experience. Colors can be selected using the Color Freeze feature.

1. Garden Green
2. Cool White
3. Sunset Orange
4. Blooming Violet
5. Island Blue
6. Miami Red
7. Deep Ocean Blue

## Choosing Your Solid Color

Using the color Freeze feature you can freeze any solid color from any of your Wave Blend shows. To active the Color Freeze feature during any of the Wave Blend shows, when the desired color is reached turn the pool light power off and then back on again within one second to freeze color.

## Wave Blend Shows

Five Wave Blends from which you can choose:

1. Mellow Wave, a two minute color sequence of the seven solid colors holding for eight seconds on each before blending to the next.
2. Rapid Wave, a fast change between seven solid colors in half second intervals.
3. Long Wave, a very slow cross-fade seven solid colors sequence holding for ten minutes before blending to the next.
4. Anthem Wave, a red white and blue themed blend that lasts three seconds before blending to the next.
5. Ocean Wave, simulating the transitional colors of the oceans waters from green to blue.

## Choosing Your Wave Blends

To move from one wave blend to another wave blend show, turn the pool light off for 2 seconds and then back on again.

## Wave Blend Memory Mode

When LAMPAOUS® Color Pool Bulb is turned off for at least 8 second, the Wave Blend on display will be stored. The next time the power is turned on, the light will resume displaying that same Wave Blend.

## Solid Color Memory Mode

When LAMPAOUS® Color Pool Bulb is turned off for at least 8 seconds, the solid color on display will be stored. The next time the power is turned on, the light will resume displaying that same solid color

## Reset Mode

To resume Wave Blend turn switch off and then back on again within one second, or to select a new blend turn the pool lights power off for 2 seconds and then back again.

## Synchronizing Multiple Bulbs

To synchronize multiple bulbs you must turn switch off and then back on again after 5 seconds, you will see lights flash red indicating the synchronization of the bulbs. Due to the reaction time difference for different users, you can turn switch off and back on again between 4 to 6 seconds to see if the lights flash red 3 times when you failure to synchronized the bulb after 5 seconds. Making sure all bulbs been synchronized working under the same power switch.
