Q: HOW TO CARE, MAINTAIN AND ENHANCE THE NATURAL BEAUTY OF NATURAL STONE INSTALLATION AND ON?

A: NO ALKALINE AND NO ACID BASED CLEANERS BE USED ON NATURAL STONE. USE PH NEUTRAL CLEANING PRODUCTS ONLY.

- CLEAN AFTER INSTALLATION

Any mortar on the surface of the stone should be cleaned up during installation process before it has a chance to harden.

- CLEAN DAILY

Natural stone surface require soft brush to remove dust, or clean up with water. Further, use cleaning solutions specific to natural stone.

- SEALING AND ENHANCING

A sealer can be used in areas with heavy use like kitchen back splashes. A sealer can prevent staining on light color natural stone and can easily clean up.

Using an enhancer on installed natural stone veneers will bring out the deep color of the natural stone changing it to a richer, darker look.
