STOP! MUST READ

PLEASE REMEMBER TO VIEW THE ASSEMBLY VIDEO BEFORE PROCEEDING!

For Assembly video and Troubleshooting Tips, please visit below link or scan the QR code below with your mobile phone. tinyurl.com/xpro68

Upon receiving your vehicle (and after reviewing the video) we recommend that you heed the following tips:

1. Perform your first **oil change** by replacing the engine oil with 10W40 motor oil prior to starting. Always remember to check your oil level.
2. Fill the tank with new **unleaded gasoline**. If gasoline has been left in your tank for an extended period of time, replace it with some fresh unleaded gasoline. After adding gasoline, squeeze the **oil bubble** according to the instructions in the manual until there is no air in the oil inlet pipe.
3. Always remember to check and **tighten your bolts** before you ride for safety. You can also use a little Loctite Threadlocker to reinforce the loose screw.
4. Make sure **kill switch** on handle bar is OFF. If the kill switch is engaged, the unit will not start.
5. Make sure **ignition key** is turned to the ON position. If the ignition key is in the OFF position, the unit will not start.
6. Make sure the **choke** is in the UP position when your vehicle is in use. When starting the gasoline engine, turn the choke OFF/DOWN after the engine gets warmed up enough. Return the choke to the UP position and the vehicle begin riding.
7. Lightly tug on the **pull-start** cord to start. Pull a little bit when you feel resistance and then reset and pull again.
8. Please be sure to fully release the **throttle** before you hold brake lever. This will effectively reduce the braking distance and make your ride safer.
9. Always make sure the front and rear chain sprockets are on a straight line. And then adjust your **chain** to proper tension if necessary.
10. The load-bearing capacity of the **front and rear luggage** racks cannot exceed 15lbs, and children cannot sit on them.

If you have any questions or issues, just feel free to contact us, we are always here to help. Thank you!
