Set up router

This device only supports 2.4GHz frequency band router, does not support 5GHz frequency band router, please set the relevant parameters of the router before WiFi configuration, WiFi passwords do not include special characters such as ~!@#\$%^&*(). When the device is configured in WiFi, the mobile phone and device are as close as to the router, which can speed up the configuration of the device.

Please keep network available

Registration process

Step 1 Open the LaView App, click "Register", read the "Privacy Policy" and click "Agree" .

Update date: 2016.4
Come into force date: 2016.5

Do you have purchased our Smart LifeSmart device hardware and are starting to use the Smart LifeSmart device software and all its functionalities. Any information you share with us (e.g. for creating a Smart Life Account) will help us to provide you with services related to Smart LifeSmart device and to improve them to make them even better. We explain here our ways of collecting and using information, and how we protect your privacy. In this privacy policy, "personal data" means information that can be used to identify an individual, either from that information alone, or from that information and other information we have access to about that individual. We collect both personal and non-personal data to enable and facilitate the best user experience possible.

What information is collected and how do we use it?

- 3 In "Add Device" this interface, continue to click "next step", and then you should input your WiFi's passwords.

Add Device

Power the device on and make sure the indicator is flashing quickly or a prompt tone is heard

Help

next step

Enter Wi-Fi Password

Only support 2.4GHz Wi-Fi network

OK

Note:

- 1) Camera only supports 2.4GHz WiFi network.
- 2) The number of bits in the ssid and passwords of the router should not exceed 24 digits.

- 4 In this interface, you should scan the QR code in your phone with the camera, when the camera comes out "dong dong dong". And you can complete the configuration about 30s.

Scan with the camera

When you tap CONTINUE, the mobile phone displays a QR code. Hold the camera 15 to 20 cm in front of the mobile phone for the camera to scan the QR code.

Continue

Heard nothing at all

Heard the beep

- 5 When connecting, you should make sure your router, mobile, and camera are as close as possible. When camera is added successfully, you may customize the name of the camera in the App interface

Q: In the network process, the process bar is always not 100%, add failure?

A: This camera only supports 2.4GHz WiFi router, please make sure you are using a 2.4GHz WiFi router. And confirm the WiFi password again.

Q: Repeated additions are failures?

A: After adding a failure, it is recommended to restart the device or power off, and then try to add again.

Q: The device cannot be previewed properly?

A: Check whether the network is normal, you can place the camera close to the router, and if not, it is recommended to reset the device and add it again.

Q: How to cut the camera network to another router?

A: First remove and reset the device on the App and then configure the device again by the App.

Q: Why I can't get the notifications with my cell phone App?

A: Please confirm that the App has been running on the phone, and the relevant reminder function has been opened; Message notification and authority confirmation in the mobile phone system have been opened.

Q: Why doesn't the device identify the SD card?

A: It is recommended to plug in SD card after power cut. Confirm whether the SD card is normally available and the format is FAT32. And the TF card can't be identified when the internet environment is not good.
