PLEASE USE IT ON DRY HAIR ONLY.

- Step 1. Insert the power plug into a wall socket to enter standby mode, press the lock switch to release the heating panel.
- Step 2. Long press the button " ⏻ ", the heater begins to warm up, negative ion emitters start to work also.

The recommended temperature for different types of hair is shown in the following table:

Hair types	Appropriate temperature
Extra fine hair	320 °F(160°C)
Fine hair	360 °F (180°C)
Medium hair	400°F(200°C)
Coarse hair	430 °F(220°C)

Press power button again to adjust temperature according to your hair types. Default temperature is 320 °F(160°C).

- Step 3. When the waver is heating up, the temperature setting indicator will keep flashing until the setted temperature is reached.

Once the temperature setting indicator stays unchanged, the device is ready to use for hair styling. Please hold the device handle and keep a safe distance from exposed skin and eyes.

- Step 4. Hold certain parts of your hair with clips (thickness less than 100mm) from top, middle, back, front and sides in order to make hair styling operation easier.
- Step 5. First wave the lower layers of your hair and then pass to the upper layers. Take a small part of your hair, disperse it in the middle of the device and then press tight. Hold the hair waver in one of your hands and the other hand press the cool tips tight, wait for 5 ~ 8 seconds, then change the palce to make styling. Do not hold the hair waver in one place for more than 10 seconds. Make sure that you are holding the hair waver by its handle. Repeat this operation until your hair is waved as desired.
- Step 6. Once the hair styling is completed, long press the power button to power off the device. Then unplug it and lock the device to let it down before storage.

OPERATION GUIDE

- 1 Turn on the device and set the suitable temperature.

- 2 Grab a proper amount of hair and use the curling iron to clamp the place you want to wave.

- 3 After clamping for 5-8 seconds, open the curling iron to complete a styling.

- 4 Repeat 3rd operation until your hair is waved as desired.

PRECAUTIONS FOR USE

- When using this comb, please ensure that your hair is dry, or you will not be able to achieve the styling effect or the effect is not ideal.
- After each using, wait until the heating plate be cool before storage.
- The storage of the power cord, do not wrap the power cord in the product.
- If there is a stain on the surface of the product, use a wet towel with detergent to wipe, do not wash it with water.
- Do not use this product for any other purpose than hair styling.

⚠ ATTENTION

- The hair waver has an automatic turning off feature for security. The hair waver iron turns off after a usage of 60 minutes. If you want to use it again, you can press the power button to turn on the appliance.
- First time usage of this appliance may occasionally cause a slight burning smell or very light smoke, which is caused by the small amount of residual oil on the PTC heater burning off when heated. This is normal and safe to use and should only last a few seconds.
- It is important to set the appropriate working temperature for your hair before usage in order to prevent your hair getting damaged.
- When the PTC heater is on, the appliance can get extremely hot, make sure you keep it away from eyes nose hands neck and facial areas.

MAINTENANCE AND CLEANING:

- Unplug the appliance and allow it to cool.
- Wipe the surfaces with a damp cloth to clean
- Do not use harsh or abrasive cleaning agents or solvents.
- Store the appliance in cool, dry place.
