10. FAQs

Q : Fail to add device during net-pairing?

A : Please make sure the mobile phone and device are connected to 2.4GHz router. Make sure the correct Wi-Fi password is entered.

Q : Still fail to add device after re-scanning?

A : If fail to add device, it is recommended to restart the device or power off the device, and try again.

Q : The device cannot preview?

A : Check for weak Wi-Fi signal. You can place the camera close to the router. If it still doesn't work, reset the device, and add it again.

Q : Why the device is still on the list after resetting the device?

A : The device resetting only resets the camera's network configuration and cannot change the configuration on the App. You must log in the App to delete the camera from the list

Q : How to connect the camera to another router?

A : First log in the App to delete and reset the device, and configure the device again through the App.

Q : Why the device cannot identify SD card?

A : It is recommended to insert and remove the SD card after power off the device. Check if the SD card is under normal service conditions and the format is FAT32. The App shall suggest "could not find SD card" under unstable network of the mobile phone or the device.

Q : The device is online and has an alarm event, but the mobile phone cannot receive the information?

A : First confirm that App allows notification in the settings of your mobile phone. Under normal circumstances, when an anomaly is detected, a message will appear in the notification bar of your mobile phone. You should set a notification sound or vibration in your mobile phone.

In addition, when viewing the real-time video in the App, you cannot receive alarm of the camera I being viewed. Because the device defaults the camera being viewed indicating that the user is focusing on the monitoring video, and there is no need for an alarm.

11. Standards

This product bears the selective sorting symbol for waste electrical and electronic equipment (WEEE). This means that this product must be handled pursuant to European Directive 2012/19/EU in order to be recycled or dismantled to minimize its impact on the environment. For further information, please contact your local or regional authorities. Electronic products not included in the selective sorting process are potentially dangerous for the environment and human health due to the presence of hazardous substances.

In compliance with European laws. This product is in compliance with the essential requirements and other relevant provisions of Directive 2014/53/EU (RED)

This product was designed and manufactured in compliance with Directive 2011/65/EU of the European Parliament and of the Council on the restriction of use of certain hazardous substances in electrical and electronic equipment (RoHS Directive - RoHS) and is deemed to comply with the maximum concentration values set by the European Technical Adaptation Committee (TAC).
