Delete Character(s) on Output Result

Inateck BCST-32 can help users delete character(s) on output result, either beginning characters or the ending ones. 0 to 99 digits can be deleted. As default setting, no character, or say 0 digit is deleted as output result. More details are as below.

1. Scan "Delete Beginning Character(s)" Barcode or "Delete Ending Character(s)" Barcode

Delete Beginning Character(s)

Delete Ending Character(s)

2. Scan the digit(s)barcode to be deleted.

(*) 0 digit

1 digit

2 digits

3 digits

4 digits

5 digits

6 digits

7 digits

8 digits

9 digits

Note: Refer to the setting of “delete 0 digit character” if no character should be deleted.
