Driver Installation & Printing Setup Guide
For MacOS / Windows

Insert the U disk that came with the package, and open the corresponding folder to install the driver according to the *Installation Guide* (or visit our website www.jioseprinter.com to get it).

- MacOS Setup
- Windows Setup
- Jiose USER GUIDE

▶ **Note**
Make sure the label printer is connected to your computer with the USB cable and turn ON (I=ON) **before installation**.

The *Printing Setup Guide* and *Shipping Label Printing Guide* are also contained in the U disk for your reference, please check.

- J500 Drive Installation Guide for MacOS
- J500 Printing Setup Guide for MacOS
- Shipping Label Printing Guide
- Jiose-Mac-Driver v1.1.7
  Type: WinRAR ZIP

Label Setup

1. Automatic Label Identification
(No need to open printer while loading labels)

① Connect the printer to power, and turn it ON.
② Adjust the guide rail (see the picture a).
③ Insert the label deeply & straightly along the guide rail with no gap and deviation (see the picture b).
④ Then, the printer will automatically catch the label, and roll the first label back and forth once to identify it. Finally, it will positioned at the tear off point.

(a)　　　　　　　(b)

▶ **Note**
Print side should be facing up.

Label Setup

2. Run the Intelligent Label Study

① After the Automatic Label Identification, **press the Feed Button until you hear one beep,** then release it (see the picture c).
② The printer will move the label back and forth at the previous 2 joints of the label, to study the label size and gap size of your label (see the picture d).
③ After studying the label, the printer will positioned at the tear off point, and no waste of any blank labels.
④ Then, the printing can begin.

(c)　　　　　　　(d)

▶ **Note**
Every time you change the label size, please run the **Intelligent Label Study** before printing.

Connection	USB
Weight	1.59 lbs / 0.72 kg
Dimensions	176 x 110 x 93mm (L*W*H)
Compatible	Windows (XP and Latest) Mac (10.9 and Latest) Linux
Operating Environment	Temperature: 0 to 45 ℃ Humidity: 10% ~ 80%
Storage Environment	Temperature: -10 to 50 ℃ Humidity: 10% ~ 90% (Non condensing)

Maintenance

Printer Head Cleaning Steps:

> **Turn the printer off**, remove the power cable, and open the cover.

> **Wait until the printer head cools down**. The printer head can be very hot after printing.

> Completely **clean printer head using an alcohol swap** (not water).

> Wait **until the alcohol has completely vaporized**, then close the cover.

> Connect the power cable and **print a test page** to check if it is clean.

▶ **NOTICE**
Ensure the power is off when performing maintenance.
Do not touch or scratch the printer head surface, roller, or sensors.
Avoid gas, acetone, or other organic solvents.

Safe Notices

> The printer head can become very hot after printing labels. Do not touch the printer head.

> Do not bend the power cable excessively or place objects on the cable.

> Do not use the printer if you find any irregularities as these could result in fire or electrocution.

> Use only approved accessories and do not try to disassemble or repair the unit by yourself

> Keep the printer away from water and other objects that could penetrate the components.

> Please unplug the printer when it is not in use for long periods of time.
