KOSPET

Optimus 2

1.Information Regarding Safe Usage:

Thank you for choosing KOSPET products. To ensure the best performance of the device, please read and follow all the safety information carefully before using it.

1) In gas stations, chemical plants and other public places where the usage of electronic products is prohibited, please observe the relevant regulations of the area and keep a certain distance from these places when using the device.

2) The radio waves generated by this device may affect the normal operation of implantable medical devices or personal medical devices. If you are using these medical devices, please consult the device manufacturer for the conditions of using these devices and follow their directions.

3) Radio waves generated by electronic devices may interfere with the safe flight of the aircraft. Please follow the airline's requirements to keep the device off while you are flying.

4) This device can work normally in an environment with a temperature of 0 ~ 35℃.The device with its accessories can be stored in a place with a temperature of -20℃ ~ +45℃. A temperature too high or low may damage the device and cause malfunctions.

5) Do not expose the device to extremely high-temperature environments like scorching sun rays or around high-temperature devices like heaters, ovens, microwave ovens, or water heaters. High-temperature environments may cause battery explosions or other safety accidents.

6) This product uses a non-removable lithium-polymer battery. To avoid accidents, non-professionals are not suggested to disassemble the battery.

7) Before using this product, please charge the product for 1-2 hours with original accessories and a safety-certified charger.

8) Some KOSPET products are equipped with magnetic charging cables. Please keep the charging device away from other metal objects, or the magnet attraction between the charging device and other metal objects might result in a short circuit fire or other accidents.
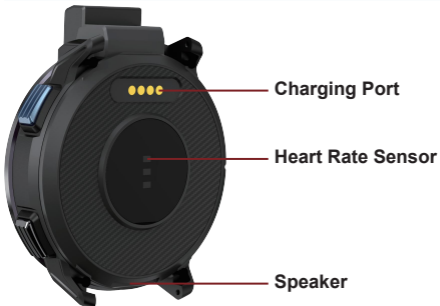

9) Our company's products are not a sophisticated medical device. The detected heart rate, blood pressure or other health-related values are for reference only and cannot be used as a clinical basis.

2.Product Specifications:

Product Model	Optimus 2
Processor	MTK6762+PAR2822
RAM & ROM	4GB+64GB
Watch Material	Ceramic+PC
Strap	TPU 24mm
Display Screen	1.6"IPS 400*400 pixels
Camera	13MP Rotating Camera+Auto focus+Flashlight
Battery	1260mAh lithium-polymer battery
Blood oxygen	Supported
Heart Rate Measurement	Supported
WIFI	2.4GHz/5GHz
Bluetooth	Bluetooth 5.0
GPS	GPS/A-GPS/GLONASS/Beidou
SIM Card Type	Nano
Waterproof Level	Life Waterproof
Network Frequency Range	GSM: 850/900/1800/1900
	WCDMA: B1/B2/B4/B5/B8
	TD-SCDMA: B34/B39
	LTE-FDD: B1/B2/B3/B4/B5/B7/B8/B12/B17/B20
	LTE-TDD: B38/B39/B40/B41(100MHz)

4. Watch Charging:

1) Please charge the watch for 1-2 hours before using this product.

2) Connect the Pogo data cable to the power adapter, and then charge the watch.
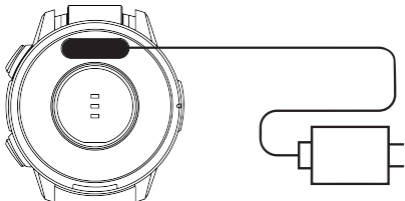

3) It is strictly forbidden to connect the Pogo charging cable to metal products, which may cause a fire.

Resolutions for Charging Malfunction:

1) If the connection between the charging cable and the charger is unstable, please reconnect the data cable and the charger.

2) If the device can not be turned on or charged, please use a 5V / 2A or above charger to charge the device for more than 20 minutes to activate the battery.

3) Contact KOSPET customer service to obtain a new charger.

4) In your city, find a professional mobile phone repair shop to disassemble and reinstall the battery.

5. Download the Watch Assistant APP:

1) Before using the watch, you can use your mobile phone to scan the QR code below to download GaoFit.

2) Or you can search for GaoFit in Google Play store and Apple App Store to download.
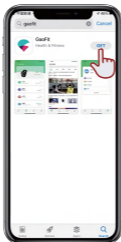

6. Install the Watch Assistant App:

1) When installing the APP, you need to give GaoFit permissions to use the phone's Bluetooth, send messages, obtain your location, etc.

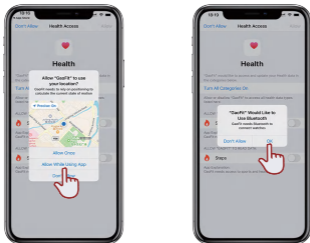

2) When you install the GaoFit application on your Android phone, some phones require you to set GaoFit as a "whitelist" application in the system settings to ensure that this application will not be forcibly closed when the phone is off.
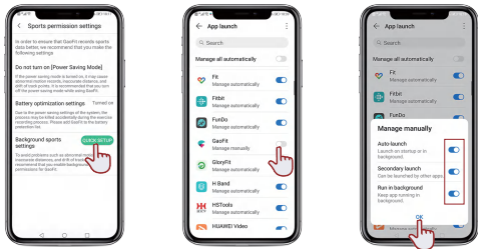

※The picture shows Huawei mobile phones. Different models of mobile phones have different settings.

3) You need to register an account before using the app, and then you can use the app after logging in.You can also use the guest login to directly enter the APP.
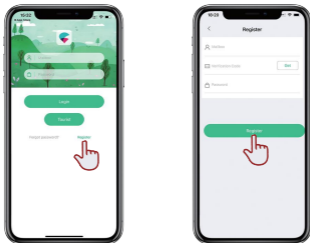

4) When logging in to GaoFit, please input your height, weight, sleep and other information truthfully, which will help the watch to record various exercise data more accurately.
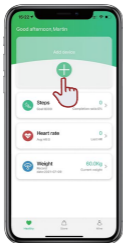

7. Connect your phone and watch through GaoFit:

1) Slide down the watch to enter the menu, click on the " 📱 " to enter the connection interface.

2) Click to enter Device on GaoFit, click " 🔵 " in the upper right corner to scan the QR code of the watch.

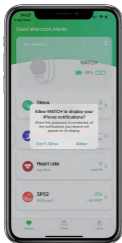

3)Tap pair on the phone and watch respectively.

4) The watch and mobile phone are successfully connected.

5) For ios phones, you need to allow notifications from the watch iPhone.

Notice: iPhone may delay the pop-up dialog box. If you do not allow your watch to receive iPhone notifications, your watch will not be able to synchronize the latest phone calls, text messages, and design application messages.
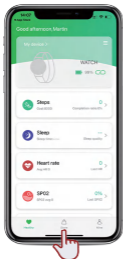

6) On the Device interface, click WATCH to enter more settings: Silent mode, Application reminder, Lookup device, Auxiliary input Etc.
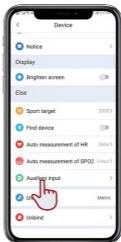

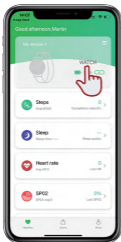

Auxiliary input: When you enter text on your phone, the watch will synchronize the text.
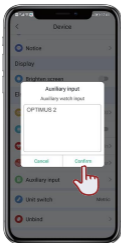

7) You can download the watch face to your watch here.

The phone and watch cannot be connected, troubleshooting method:

1) Make sure that the Bluetooth of the mobile phone and watch is turned on.

2) In Phone-Settings-Bluetooth, delete all paired Bluetooth devices; on the page where the watch is to be connected, click the "trash can icon" to delete all paired devices, restart the watch and phone, and then connect again.

3) Download and install GaoFit again.

4) Change to another mobile phone to download GaoFit connected watch.

5) If none of the above-mentioned resolutions work, please contact KOSPET customer service at after-sales@kospet.com.

10. Other functions:

This product is a smartwatch phone based on the Android operating system. The main functions are in accordance with those of other Android phones. That's why they are not mentioned in the manual. If you have any questions, please contact our after-sales customer service staff.

For more product details, please visit the KOSPET official website:
e www.kospet.com

11. Common troubleshooting Resolutions:

1) The watch cannot be turned on?
Please refer to "Resolutions for Charging Malfunction" at page 7.

2) Can't connect the phone to the watch?
Please refer to "Resolutions for Connection Failure" at page 16.

3) The phone cannot recognize the SIM card?
a. Please refer to "SIM Card Installation Directions" at Page 5.
b. Please install another brand-new SIM card into the watch to rule out the possibility of a bad SIM card.
c. Please check the SIM card slot to see whether it's dirty or deformed.

4) Forgot the unlock pattern? The watch cannot be unlocked?
Visit the KOSPET official forum, download the flash tool and firmware (Re-flash Rom), and flash the watch.

5) The standby time of the watch is too short, is there a problem with the battery?
The practical standby time depends on the different using habits and frequencies of each user. This device is based on the Android system with abundant functions and powerful configuration. When the applications with high power consumption such as calls, social media apps, and games, the actual standby time may only normally be 3-5 Hours.

6) Is the watch easy to get hot?

As mentioned above, this product is rich in functions and powerful configurations. If you use high-power applications for a long time. Because the processor generates a lot of heat at high speed running, the watch is with a small surface and the heat dissipation is relatively slow. Try to avoid using high power consumption applications for too long, and take some time and methods to lower the temperature of the device in time.

7) Does it support Bluetooth calling?

Not supported, you need to install a SIM card to use the calling function.

8) GPS function failure?

a. Please check the GPS setting (watch → setting → connection →GPS) to check whether the GPS is turned on, and set the GPS to high precision mode.
b. When you use the GPS function for the first time, please use GPS positioning in an open outdoor area. After the GPS initially locating the city, the subsequent use of GPS positioning will be faster.
