## A INSTALLATION DIMENSION

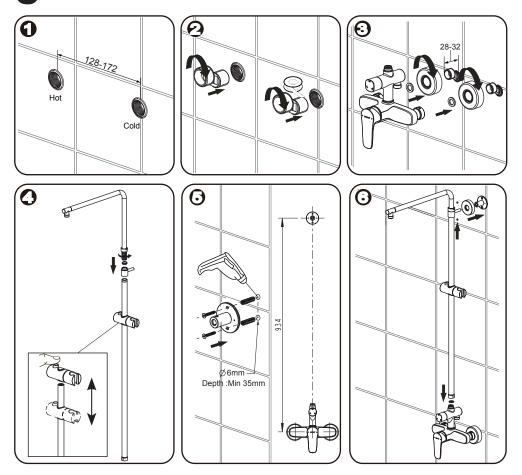

### B HELPFUL TOOLS

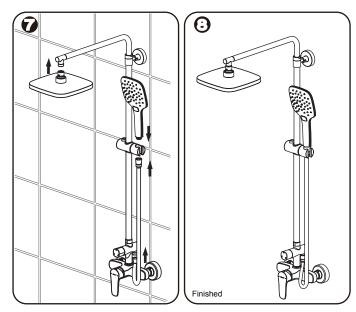

#### Points for attention before installation

- Before installing the new mixer, it is essential that you thoroughly flush through the supply pipes in order to remove any remaining swarf, solder or other impurities. Failure to carry out this simple procedure could cause problems or damage to the workings of the mixer.
- Work water pressure: 0.5-5 bar (Including cold and hot).
- If the pictures and statements in the 'Installation Specifications' is unconfirmed with practicality, please take practicality as standard.
