POINTS FOR ATTENTION BEFORE INSTALLATION

CAUTION: Before commencing installation, **ENZO RODI** strongly recommends reading this manual.

- The shower room should be built by the qualified personnel in accordance with this installation instruction. If not, this room may not be firm or even fall down, resulting in the product damage or personnel injury.
- The quantity of parts should be checked after opening the box. The glasses must be vertically transferred by two people and should be smoothly placed vertically against the wall. The horizontal placement can easily result in the damage of glass. Especially pay attention to that the collision to four corners of glass should be forbidden.
- Do not heavily knock on the glass to avoid damage.
- Before building this shower room, please carefully read this instruction and be familiar with the required tools and installation order. Comply with the contents of all items available for your installation, to avoid the costly losses. In addition to the proper installation, you should also read this operation and safety instructions.
