QUICK USING GUIDE

** INSTALL

Step1. Install the front wheel
Press the red button, adjust the direction of the wheel, insert and lock it firmly.

Step 2. Install the back wheel

Check the slot of the metal leg and insert to the rollator body. You will hear "CLICK" if you operate well. Then screw up the long handle bolt. Double check it is firmly installed.

Step 3. Push on the seat

Open the rollator and push on the seat from the edges. You will hear "CLICK" if you operate well. Double check it is firmly installed.

Step 4. Install the back belt and mesh bag

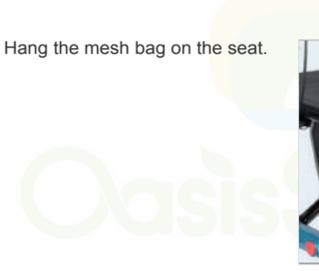

Install the belt in this way.

<1> Lower down the handle and put up the brake cable.

<2-2> Insert the buckle to the bolt

<2-1> Insert the buckle to the bolt

<3> Press the buckle to the end

Hang the mesh bag on the seat.

The seat could be used ONLY in parking position

** Prepare to Go

Adjust the height of armrest

Press the red button and adjust the height of armrest to the confirmable position. Makesure both of armrest are in the same height.

Brake and Park

Pull both brake handles upwards to stop the rollator as you need.

Push the brake handles downwards until they lock into place with "click" to park the rollator. Pull the brake handles back up to release parking position.

Tilting Aid

Step on the tilting aid, pull back on the handles at the same time to raise the front wheels.

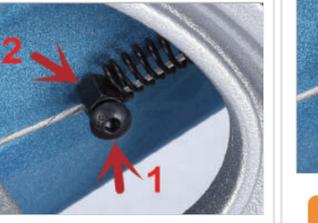

This will allow you to get over curbs and other small obstacles with little effort.

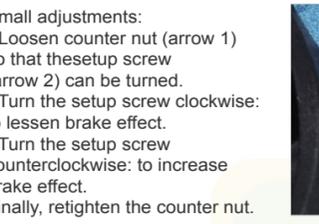

Please keep the rollator stable when use the tilting aid.

Adjust the brake

- * Loosen allen screw (arrow 1)
- * Tighten or untighten the cable by pulling it out or pushing it in (arrow 2).
- * Then refasten allen screw.

Do not move the rollator when adjust the brake.

Small adjustments:
* Loosen counter nut (arrow 1) so that the setup screw (arrow 2) can be turned.
* Turn the setup screw clockwise: to lessen brake effect.
* Turn the setup screw counterclockwise: to increase brake effect.
Finally, retighten the counter nut.

** Storage

To fold and storage the rollator, you just need pull up the handle on the seat and operate the install step oppositely.

**Repair Parts

x3 screws and x3 springs for Height Adjustment Locker Repairing

x1 Allen wrench for Brake Adjustment

TIPS FOR FIRST USE

- * Please check the brake, wheels before using.
- * The rollator should be used on a level, dry ground. Practice using the rollator until you feel comfortable. Using correctly could help you enjoy your walking!
- * When you use the rollator please keep your hands grip the brake. It can ensure you to stop the rollator immediately and effectively reduce the risk of falling.
- * Avoid sudden braking otherwise the rollator will slip especially on the wet smooth surface.
- * If possible please find somebody to help you to go up stairs, take the elevator and e.g.
- * The maximum weight capacity is 300-350 lbs and 11 lbs for mesh bag.
- * It is not recommended to use the rollator in BAD WEATHER (Rain/Storm/Lighting e.g.) or on the smooth/wet ground.
- * Please slow down when start heading downhill.

CLEAN AND STORAGE

- * The frame part can be wiped with a damp cloth or washed with neutral cleaning agent.
- * The wheels can be cleaned with a damp brush with plastic bristles (DO NOT use wire brushes)
- * The seat back, seat and transporting pouch can be washed with a mild soap.
- * Do not use a high pressure or steam cleaner.
- * Dry the rollator with a towel. If possible use some machine oil on the parts of brake to avoid rusting such as brake cable, screw, e.g.
