#### CERTIFICATE OF LISTING

IAPMO Research and Testing, Inc. is a product certification body which tests and inspects products taken from the supplier's stock or from the market or a combination of both to verify compliance to the requirements of applicable codes and standards. This activity is coupled with periodic surveillance of the supplier's factory and operations as well as the assessment of the supplier's Quality Assurance System. This listing is subject to the conditions set forth in the characteristics below and is to be construed as any recommendation, insurance or guarantee by IAPMO Research and Testing, Inc. of the product except as by American Testing Foundation.

Effective Date: August 2013 Void After: August 2016  
Product: Plumbing Fixture Fittings File No. 6737

Issued To: Kaiping Heart Cartridge Co., Ltd.  
No. 28 Heliwan Dong Road,  
Shilong Town,  
Kaiping City, GUANGDONG  
China

Identification: Plumbing supply fittings complying with this Standard shall be marked with the manufacturer's recognized name, trademark, or other mark or, in the case of private labeling, the name, trademark or other mark of the customer for whom the fitting was manufactured. The marking shall be accomplished by use of a permanent mark or by placing a permanent label on the product. Markings on plumbing supply fittings shall be visible after installation.

Single-handle, single-control, and automatic compensating mixing bath and shower valves shall have identifiable temperature control settings in which the settings are indicated by words ("cold", "warm", "hot", etc.), by numbers, or graphically.

Packages shall be marked with the manufacturer's name, trademark, or other mark as well as the model number or, in the case of private labeling, the name, trademark, or mark of the customer for whom the fitting was manufactured as well as the model number.

# INSTALLATION STEPS

This product has been inspected and debugged by the factory to the best condition. Please do not disassemble and assemble it yourself.

Before installing the faucet, please be sure to remove sundries and sludge from the water pipe to prevent sundries from blocking the faucet.

1. According to the basic size of the embedded box, use a special tool to open the main hole on the solid wall. The depth of the hole is as shown in the figure. It should be ensured that the distance between the surface of the finished wall and the bottom of the hole is between 2.16" and 2.56".

3. Connect the inlet and outlet pipes as shown in the picture.

2. First find the stainless steel fixing bracket, and screw it to the upper and lower extension positions of the embedded box; The slot size on the wall is 14.49"X4.72"

4. "Water tightness test:"

Keep the shower handle closed and turn on the hot and cold water inlet pipe switch. After 5 minutes, check whether there is leakage at the interface between the main body and the water inlet pipe. Block the rain shower outlet and the hand-held water outlet, keep the shower handle open, adjust the water divider, check whether there is leakage at the interface between the main body and the water outlet pipe.

# INSTALLATION STEPS

5. Make sure again that the pipeline connection is correct and that there is no leakage in the test water. Seal the embedded box and the pipeline with filler and take out the plastic protective cover.

6. As shown in the picture, affix the tiles, and open two holes with a diameter of 1.97" in the middle tile, with a distance of 5.91" between the two holes.

7. As shown in the picture, install flange, diverter handle and cartridge handle.

8. After installation, test whether each function is used normally, and wipe the surface of the faucet with a soft cloth.

9. Install shower arm and shower head (wrap the PTFE tape on the thread).

# INSTALLATION DIMENSION

The picture is for reference only, you can install it according to your own requirements.

## CLEANING CARE

In order to keep the appearance of faucet clean, bright and good performance, please take care of the faucet as follows;

1. Rinse with water only and dry with soft cotton cloth;
2. Use mild liquid and colorless glass cleaner to remove surface dirt and scale film, or use polish without abrasive effect;
3. Do not use abrasive detergent, polish, emery cloth, paper towel or scraper, etc.;
4. Do not use acid cleaner, or cleaner and soap with insoluble gran etc.;
5. In the process of use, mud may accumulate in the bubbler and make the water flow show, The bubbler can be unscrewed, rinsed with water, and then installed back in place.
