

# 1402 PM Fiber

PMF1004

PM15-U25D

The PMF1004 is designed for today's most advanced networks. Optimized for use at 1550 nm, these fibers are used in all PM applications for data and telecom. The bend insensitive versions of our fibers offer the lowest bend loss and extinction ratios at small bend diameters enabling our customers to reduce package sizes. Available in 250 micron coating diameters and prooftested to 200 kpsi.
