

0406 Optical Add-Drop Multiplexer

1535.04 nm (CH.53) 200 GHz Optical Add/Drop Multiplexer

The W2104-S allows system designers optimal configuration flexibility. These Telcordia-qualified devices can be used to suppress noise and eliminate crosstalk. These dielectric filter-based devices offer low insertion loss and high isolation in a totally passive device. Housed inside a precision machined aluminum package, these modules are ready to use.

FEATURES

- 200 GHz Spacing on ITU Grid
- Passive Design with Thin-filmed Filter
- Low Insertion Loss and High Isolation
- Low PDL, PMD

USE IN

- Channel Add/Drop
- DWDM Network
- Wavelength Routing
- Fiber Optical Amplifier
- HFC Fiberoptic System

Channel No.	53
Center Wavelength @ -0.5 dB	1535.04 nm
Bandwidth @ -0.5 dB	0.84 dB
Insertion Loss (Pass)	0.43 dB
Insertion Loss (Reflect)	0.21 dB
Isolation (Pass)	33.8 dB
Isolation (Reflect)	14.2 dB
Return Loss	45 dB min.
PDL	0.1 dB max.
Directivity	55 dB min.
