

WEARABLE SPORTS HEADPHONES

SPORTS & MUSIC

HAKII, Born in 2019, HAKII is dedicated to creating a wearable sports audio brand. Based on long-term observation of the sports lifestyle of young people, we have discovered that headphones are no longer just a tool for delivering music during workouts.

With the diverse development trend of future smart sports gear, they have evolved from listening devices to technology accessories that cater to the needs of young people. The brand interprets technology products through sports fashion, challenging technological imagination and creating new possibilities. We dare to break the norm with action and creativity. We make the impossible become incredible.
