Tips

- If it fails to connect normally, it is recommended to turn off the keyboard power, restart the Bluetooth of the device and connect again. Or delete the extra Bluetooth option name in the Bluetooth connection list of the device and reconnect.
- To switch to a channel that has been successfully connected, first press the channel button firstly, and then wait 3 seconds to keep working.
- The keyboard mouse has memory function, when the keyboard mouse is connected properly at one channel, turn off the keyboard mouse and turn on again, the keyboard mouse will be in the default channel, and the indicator of this channel is on.

Sleep Mode

- When the keyboard is not used for more than 30 minutes, it will automatically enter the sleep mode and the indicator light will be off.
- When you use the keyboard again, you only need to press any key, and the keyboard will wake up within 3 seconds. The indicator will light up again and starts to work.
