Change the 1-unit fixings of this part to 2-unit fittings

Push the shaft at the front towards the rear

Link the front and rear main bodies, and pay attention to the alignment of the four hole positions!

Pay attention to push the shaft in to connect the front and rear

After fitting, install 4 wheels to test whether the car can move forward and backward normally

使用延长线，将XL电机线头叠加

将延长线接入引到车头（后续锂电池放置于车头）

Using the extension cable, click on the line head of the XL motor to stack, and connect the extension cable to the vehicle head.

After that, place the lithium battery in the front of the vehicle

Continue to assemble the whole vehicle according to step 356 of the manual. After that, put the lithium battery in the trunk of the vehicle. Connect the motor connector and **win**

The whole power chassis has been refitted here. It's great. Inject the soul into you car and put it together.

Come on!
