1. Hose Connecting Way

The fittings of bathtub were already connected before shipment except faucet. Users need to install the faucet according to the back procedures, then connect the cold/hot water hose to the corresponding water supply tube, which should be in the shelter of the bathtub's back.

Water Inlet Faucet Connecting

2. Water Supply Chart

Installation of Bathtub

1. As the picture shows below, turn over the bathtub, wrap the drainer hole with thread PTFE tape, and then screw the drainer.

As picture show:

2. As the picture show: install the waterfall faucet and handheld shower, then connect to the water hose.

3. Adjust the tub feet to make the horizontal. Move the bathtub to the wall corner; put the drainer into sewer and seal the drainer with sealant. Seal the gap between the bathtub and the wall with sealant to avoid water leakage.
