

Please read the instructions before installation

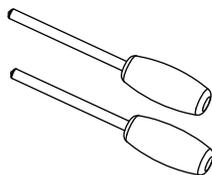

1. After unpacking, check whether the product is in good condition. The tools required for installation are not supplied with the goods. Please bring them yourself;
2. The instructions contain precautions, please keep them properly;
3. The dimension drawing of the manual is only for reference, please take the real object as the standard.

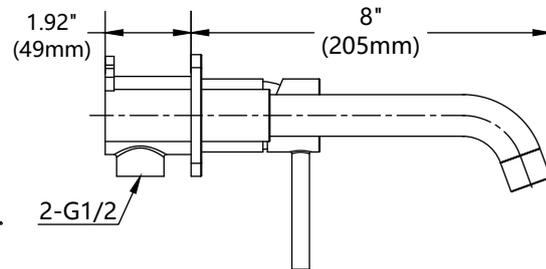

sealant

Allen key

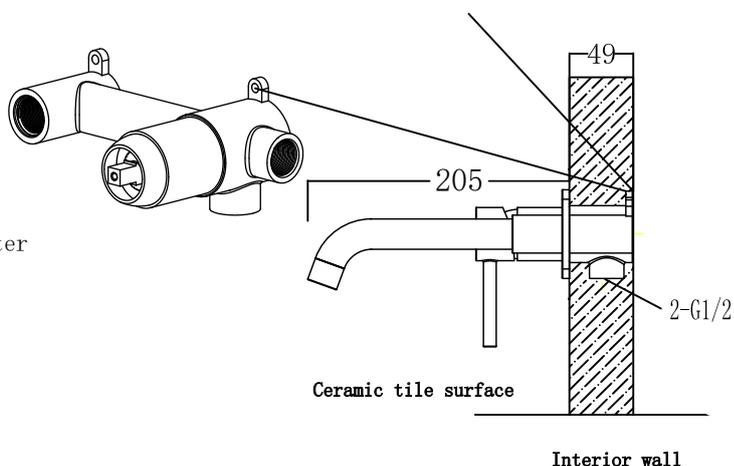

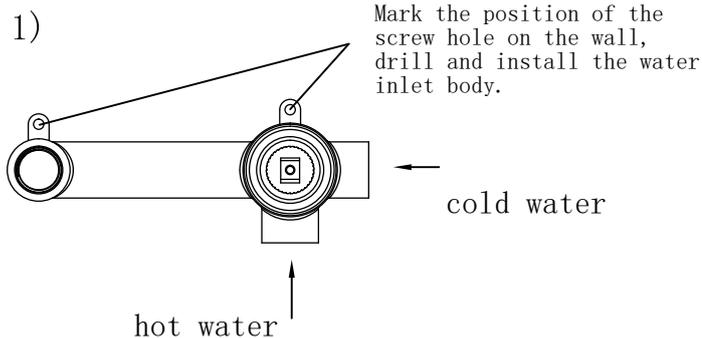

slotted screwdriver  
Phillips screwdriver

1. The sundries at the connection must be removed before installation to avoid blockage or water leakage.
2. Correctly connect the tap water inlet (hot on the left and cold on the right)
3. The maximum temperature of hot water shall not be higher than 80 °C

The interior wall is flush with the main plane

PS: In the process of embedding the wall, please do not remove the protective sleeve to avoid damaging the copper sleeve.

2) After the main body is embedded in the wall, install it in the following order:

1. Remove the protective sleeve;
2. Cover the panel;
3. Install the handle and water outlet connector.
