Introduction

The TB50 is the third generation of multimedia player created by NovaStar for full-color LED displays. This multimedia player integrates playback and sending capabilities, allowing users to publish content and control LED displays with a computer, mobile phone, or tablet. Working with our superior cloud-based publishing and monitoring platforms, the TB50 enables users to manage LED displays from an Internet-connected device anywhere, anytime.

Support for multi-screen synchronous playback and synchronous and asynchronous modes makes this multimedia player a perfect fit for a wide range of applications.

Thanks to its reliability, ease of use, and intelligent control, the TB50 becomes a winning choice for commercial LED displays and smart city applications such as fixed displays, lamp-post displays, chain store displays, advertisement players, mirror displays, retail store displays, door head displays, shelf displays, and much more.

Features

<u>Output</u>

- Loading capacity up to 1,300,000 pixels
 Maximum width: 4096 pixels
 Maximum height: 4096 pixels
- 2x Gigabit Ethernet ports

These two ports serve as primary by default. Users can also set one as primary and the other as backup.

1x Stereo audio connector

The audio sample rate of the internal source is fixed at 48 kHz. The audio sample rate of the external source supports 32 kHz, 44.1 kHz, or 48 kHz. If NovaStar's multifunction card is used for audio output, audio with a sample rate of 48 kHz is required.

1x HDMI 1.4 connector

Maximum output: 1080p@60Hz, support for HDMI loop

Input

• 1x HDMI 1.4 connector

In synchronous mode, video sources input from this connector can be scaled to fit the entire screen automatically.

2x sensor connectors

Connect to brightness sensors or temperature and humidity sensors.

<u>Control</u>

- 1x USB 3.0 (Type A) port
 - Allows for playback of content imported from a USB drive and firmware upgrade over USB.

- 1x USB (Type B) port Reserved
- 1x Gigabit Ethernet port

Connects to a LAN, public network, or computer for content publishing and screen control.

Performance

- Powerful processing capacity
 - Quad-core ARM A55 processor @1.8 GHz
 - Support for H.264/H.265 4K@60Hz video decoding
 - 1 GB of onboard RAM
 - 16 GB of internal storage
- Flawless playback

1x 4K video playback or 2x 1080p video playback

Function

- All-round control plans
 - Enables users to publish content and control screens from a computer, mobile phone, or tablet.
 - Allows users to publish content and control screens from anywhere, anytime.
 - Allows users to monitor screens from anywhere, anytime.
- Switching between Wi-Fi AP and Wi-Fi STA
 - In Wi-Fi AP mode, the user terminal connects to the built-in Wi-Fi hotspot of the TB50. The default SSID is "AP+Last 8

digits of SN" and the default password is "12345678".

- In Wi-Fi STA mode, the user terminal and the TB50 are connected to the Wi-Fi hotspot of a router.
- Synchronous and asynchronous modes
 - In asynchronous mode, the internal video source works.
 - In synchronous mode, the video source input from the HDMI connector works.
- Synchronous playback across multiple screens

Appearance

Front Panel

- NTP time synchronization
- GPS time synchronization (The specified 4G module must be installed.)
- Support for 4G modules

The TB50 ships without a 4G module. Users have to purchase 4G modules separately if needed.

Network connection priority: Wired network > Wi-Fi network > 4G network

When multiple types of networks are available, the TB50 will choose a signal automatically according to the priority.
