### Connect your NPET device to the USB port of your computer

**Note:**  
The keyboard can type normally on the ios system, but combination functions cannot work on the ios system, which does not mean that the keyboard is damaged, only the problem of system compatibility.

### FAQ

- If the keyboard doesn't respond, please check if the keyboards type-c cable is correctly inserted into the corresponding USB port on the computer, or try another USB port on the computer.
- If you spill liquid on the keyboard, please remove keyboards type-c cable from the computer immediately. Wipe up excess liquid and put the keyboard in a warm place (for instance, under a lamp) to let the keyboard dry naturally before using again.

### How to care for your keyboard

- Wire safety**  
Avoid bending it. Don't place anything heavy on it to avoid stress, which can cause cuts or breakage.
- Avoid Liquids**  
The spilling of liquids is very harmful. It can damage your keyboard's internal circuit or can cause malfunctioning of the keyboard.
- Avoid eating while sitting on the keyboard**  
Don't eat while sitting near the keyboard. When you do so, small pieces of your food can fall and enter inside the circuit, which can result in stopping one or more keys from functioning.
- Soft key press**  
Try to press the keys as softly as you can. It helps in the long life of keys and characters printed upon them.
- Cover after Use**  
Cover it to avoid dust particles. It can harm the circuit under the keys, which results in the non-functioning of one or more keys.
- Clean it properly**  
Use a can of compressed air to clean between the keys. Moisten a cotton cloth or paper towel with rubbing alcohol and use it to clean the tops of the keys. Do not pour alcohol or any other liquid directly onto the keys.

### Dear user

Thank you for you choosing NPETech, to protect your rights and for better customer service, we ask that you note our warranty rules.

- Within the guarantee period, the repair is guaranteed for failure due to electrical circuit problems. Man-made damages, such as disassembly, hard impacts, submersion into the water, plugging into improper current or voltage, and damage caused by natural disasters such as fire, flood, or earthquake are not included.
- Consumable parts (such as foot stick) and spare parts replacement are not included in our warranty.
