How to install Windows 10 OS	.3

About this guide

This guide is designed to install OS with windows 10 and how to start it.For more info, see the content as below in this guide.

How to install Windows 10 OS

NOTE: Please backup your important files to prevent them from being lost before installing Windows.

1. You need to prepare a USB flash drive of 8G or more. (Because the size of the OS files may more than 7GB)

PS: The USB flash drive should be empty, because during you fixing the Windows, the files in the laptop may lose.

2. Surf the internet and download the windows update tool as below: <u>https://www.microsoft.com/en-us/software-download/windows10</u>

Update now
Privacy
Create Windows 10 installation media To get started, you will first need to have a license to install Windows 10. You can then download and run the media creation tool. For more information on how to use the tool, see the instructions below. Download tool now
 Using the tool to upgrade this PC to Windows 10 (click to show more or less information) Using the tool to create installation media (USB flash drive, DVD, or ISO file) to install Windows 10 on a different PC (click to show more or less information) More download options

3. Save and run the tool, and insert the USB flash drive:
