About this guide

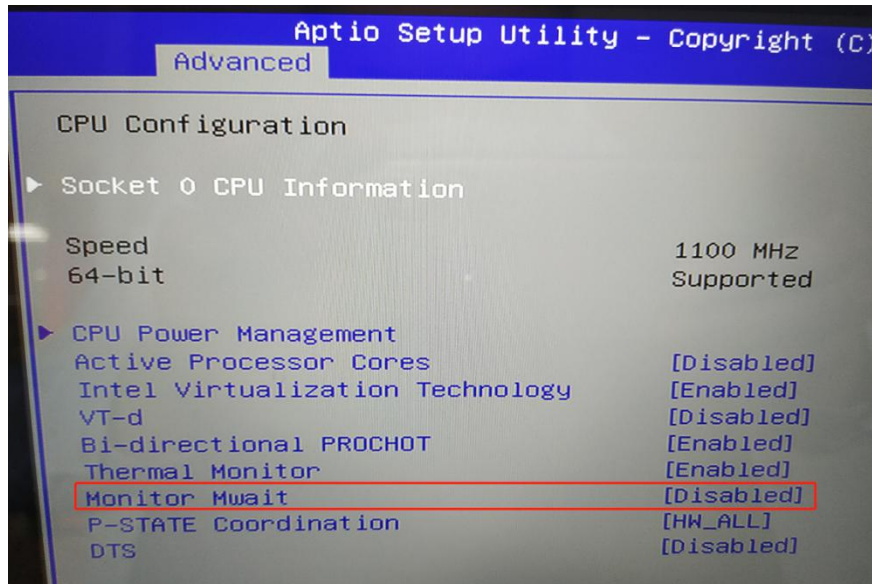

This guide is designed to install Linux and how to set the configuration on BIOS. For more info, see the content as below in this guide.

How to set BIOS

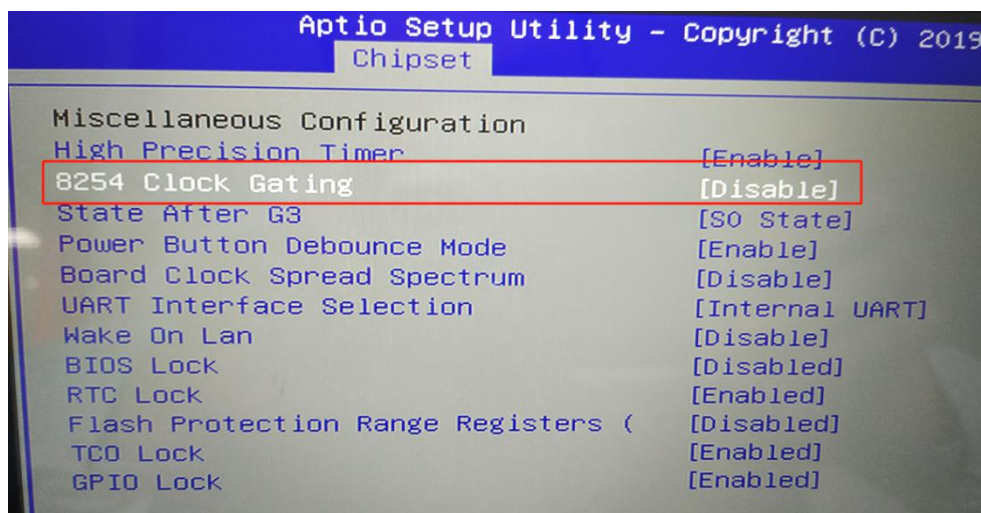

1. Insert the USB flash drive into the USB port of laptop. Turn on the laptop press "**Delete**" until the BIOS setup interface display on the screen. (knock "**Delete**" continuously)

2. set "Advanced->CPU Configuration->Monitor Mwait" to "Disabled";

3. set "Chipset->South Cluster Configuration->Miscellaneous Configuration->8254 Clock Gating" to "Disabled";

4. Press "**F4**" ,select "**YES**" and save the configuration;

5. Insert the Linux USB flash boot drive into the USB port of laptop. Turn on the laptop and press "**Fn**" + "**F7**" until boot option appears in the screen. (hold down "**Fn**" and knock "**F7**" continuously)

6. Then you can see the picture appears in the screen. You should choose your USB flash drive, and press "**Enter**":

(My USB flash drive is KingstonDataTraveler, so that you can fix the OS out of from your USB flash drive)

7. Now you can continue to install Linux on the laptop.

NOTE: Recommend install ubuntu 18.04 and the later version, otherwise may have trackpad unusable issue on the older version.

You will find LincPlus laptop page first.
Zuerst finden Sie die LincPlus-Laptop-Seite.

LincPlus P1 Laptop 13.3 Inch FHD IPS 1920x1080 Intel N4000, 4GB RAM, 32GB Memory, Metal Laptop Ultralight Slim Windows 10 Computer

Der Akku meines alten 10 Zoll Netbooks hat aufgegeben und dies habe ich als Anlass genommen, auf ein etwas größeres Notebook umzusteigen. Aufgrund des Aussehens und Preises habe ich mich für das 13,3 Zoll Notebook von LincPlus entschieden.

LincPlus **P1**
