

US-52 220V 400W ac speed controller ac regulator motor control forward backward with filter capacitor 6W 60W 250W 300W

The parameters

параметр

Dear customers, please note before buying:

- 1. First of all, please confirm whether your motor is adjustable motor (because many induction motors have fixed speed and are not suitable for speed regulation)**
- 2. We recommend the governor to be matched with the adjustable speed induction motor shown below.**
- 3. If the customer uses other motor speed regulation, we do not guarantee that it can work normally, once it cannot work normally, we support the return, but we refuse disputes!**

Please don't turn on without load.

Note:

US-52 apply for Adjustable speed AC induction motor.

6-250W without filter capacitor

Product Name : Motor Speed Controller;

Model : US-52;

Material : PVC

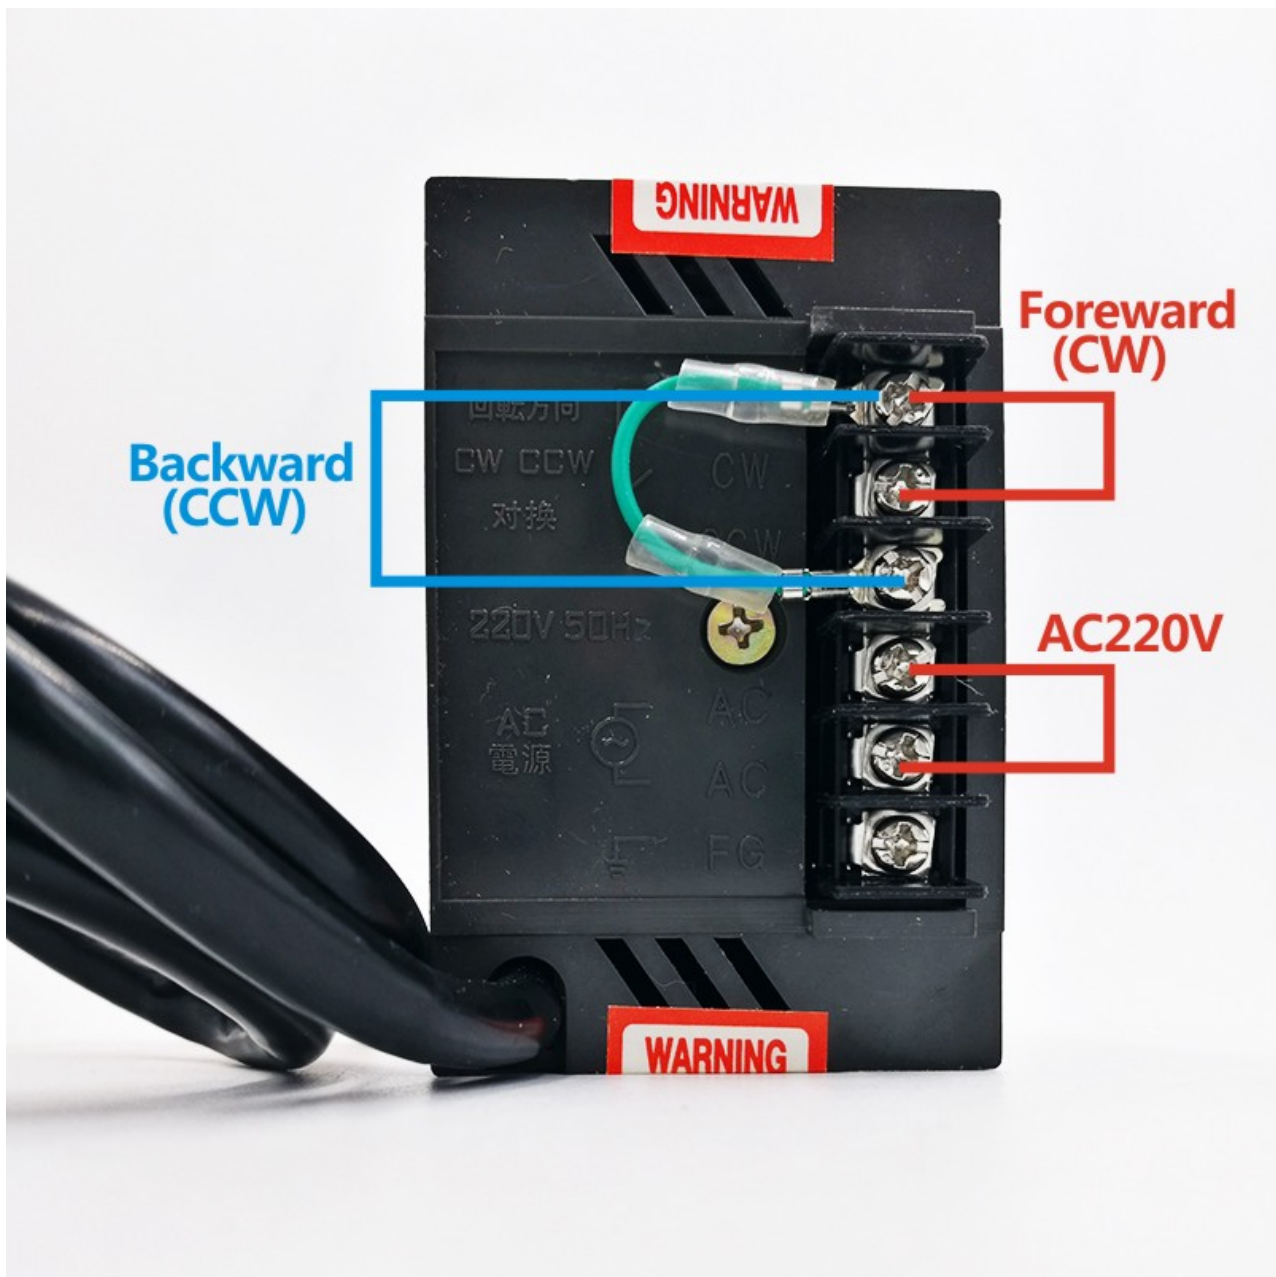

Connector Type : 6 Pins

Rated Value : AC 220V, 50HZ

Power : 6W - 400W

Cable Length : 60cm

Corotation/ Reverse Option, connect CW and COM is corotation, Connect CW and CCW is option. Green LED indicator, 6 terminals, on/ off switch for controlling, the knob switch for adjust the speed.Used for Machine Tools, Textile Machinery, Conveying Machine, Printing Mechanism,Food Machinery, Vending Machine, Packing Machinery, Gumming Machine, etc. It is not suitable for US users.

For this speed controller, the applicable motor must be 5 wires, 2 of which are speed feedback.

Without these two lines is unable to adjust the speed, and the speed is not stable

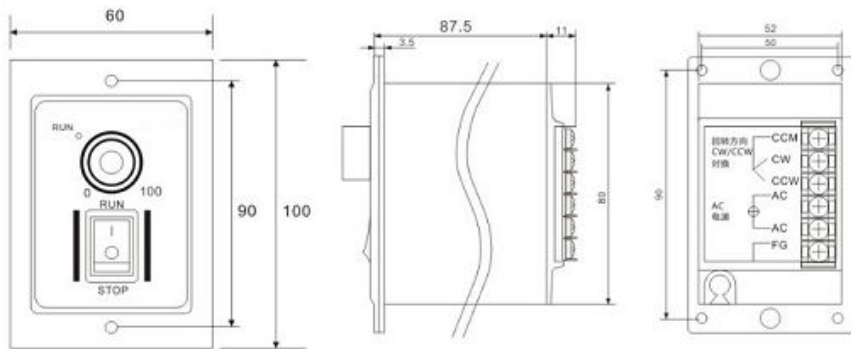

Adjustable AC Induction Motor

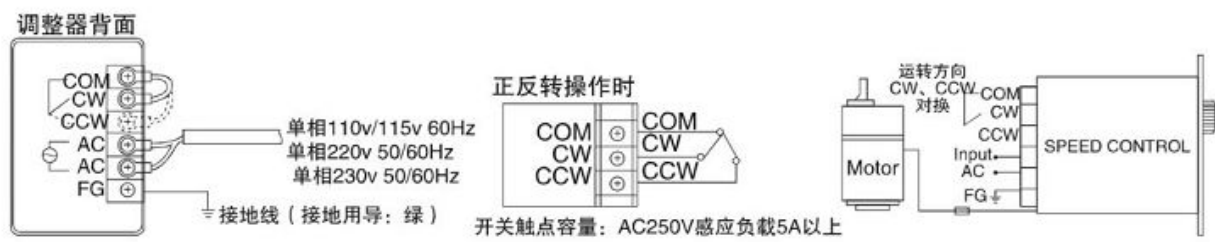

US-52

US-52 is suitable for adjustable AC induction motor. Other motors are not recommended to use it.
