K7 PRO III Operation Guide

Install Noo-psyche APP

First, download the Noo-psyche APP. Install the Noo-Psyche APP on your

device and "Allow Noo-Psyche to access this device's location" to continue.

For IOS: Download from App Store

For Android: Download from www.noo-psyche.com/Userguidance or scan the

QR code:

Keys Instruction

How to switch the light to Auto or manual?

Indicator was	Operation	Indicator become
Red(manual)	Click the L Key	Blue(auto)
Blue(auto)		Red(manual)

Notice: Only the light always on blue(auto) can connect to the APP.

Connection Mode

There are two method for the APP to connect to the light: by AP mode or by LAN mode. No matter which method is used, it can be used as long as it is connected.

How to know if the light is on LAN or AP connection mode?

Operation	If Indicator	Means it's on
Click the D Key	Flashes blue twice	LAN mode
	Flashes Red twice	AP mode

How to Switch LAN and AP mode of the light?

Switch to	Precondition	Operation
AP mode	The Indicator always on Blue(auto)	Press & hold the R key, the indicator flashes blue, loosen the R key after it stops flashing
LAN mode		Press & hold the R key, the indicator flashes red, loosen the R key after it stops flashing

AP Connection

- (1) Switch the light on AP mode. Pls learn above "Connection Mode"
- ② Open the APP, click the Portrait
- 3 Click Apply Permission, Allow Noo-Psyche to access location
- ④ Click SWITCHING NETWORK. Click WLAN and keep it on. Find the K7_Pro**** in the WLAN list, then enter the password (12345678) and click connect.
- (5) Last step, confirm it is AP connection and click SAVE.

Function

After the APP and the light are connected, access the options according to your reef tank type. There are two running mode: manual and auto. E.g. LPS.

Default spectrum preset

There are SPS, LPS, SPS/LPS default spectrum presets. If you want to use the default spectrum settings: select **Auto**, click **FACTORY SETTINGS**, finaly **Save**.

Manual – One click viewing

Select LPS. Switch to Manual. Pull the progress bar to adjust the brightness

finally **SAVE**

← Noo-Psyche	← K7 LPS :	← K7 LPS :

- ④ Set the brightness of each channel at the time point, click confirm. Click close when all is done
- (5) Click SAVE. If you want to quickly check the spectrum, click Demo Mode

Return to the homepage you will see a green dot which means running LPS setting.

Export/Import spectrum settings

Click **Export** download your spectrum settings QR code and it will save in photo album. Click **import** upload your saved QR code, finally click **save**.

Configuring Master/Slave Lighting

How to switch the light to Master or Slave?

Indicator	Operation	Indicator
Red (Master)	Press & Hold the L Key	Green (Slave)
Green (Slave)	Press & Hold the L Key	Red (Master)

- Slaves: When LED indicator is always on, press & hold the L key until LED indicator turns green then loosen it. Then click the L key (the green indicator light flashes) to standby. (all of slaves do the same)
- ② Master: When LED indicator is always on blue, press & hold the L key,

loosen it when the indicator flashing. (Master send a command to the slave, then green indicator of slave stop flashing)

Note: After adding a new light as a slave, the brightness is different with other

slaves, how to sync? Operation: Click the L key of Master to turn the indicator be red, press & hold the L key until the indicator flashes red, then loosen the L key to send data to the slaves to sync data.

LAN connection

Noo-Psyche lights only supports separate 2.4GHz routing band. If

your 5GHz and 2.4GHz are combined, the light cannot pair with WIFI through LAN mode.

Before LAN connection, **set a separate SSID for the 2.4GHz routing band** in the wireless page of the router: go to the Wireless page of the router. (The entry address is usually provided on the label attached to the back of the router). Go to the 2.4 GHz setting page, and set the Wi-Fi name (SSID) to (XXX)-2.4G, where xxx indicates the Wi-Fi name. Save setting. Please google for specific operations for more details

① First confirm the light is in LAN mode. In the blue indicator state,

press & hold the R key until the indicator flashes blue, then loosen the key to enter network waiting configurating state.

(2) Connect the phone device to WIFI of the 2.4GHz routing band. Open the

app. click the **Portrait.** Click **"Apply Permission**" to **"Allow Noo-Psyche** to access this device's location"
