## Miniwell New Arrival Water bottles with L620 filter

**Foldable Water Bottle**

# L620 Water Filter (Bottle used)

## Having a filter built into the bottle you want

L620 is lower-priced water filter for fresh water filtration. It is more suitable for daily life. It reduces a wide variety of contaminants in tap water or outdoor fresh water source, eliminate the waste and expense of plastic bottles and improve the taste of your water.

Most of bottle filters merely remove chlorine in tap water. Miniwell L620 with the combination of UF membrane and carbon fiber expands its using scope. Even natural flowing fresh water source, such as river water, stream water and rain water, can be used as source for L620 filtration.

L620 is designed for OEM Customer Participation. Miniwell can customize adapter to have L620 matching with different kinds of bottles customer provided. L620 comes along with some ideas of bottles for your selection.

# Outstanding Performance You Can Trust.

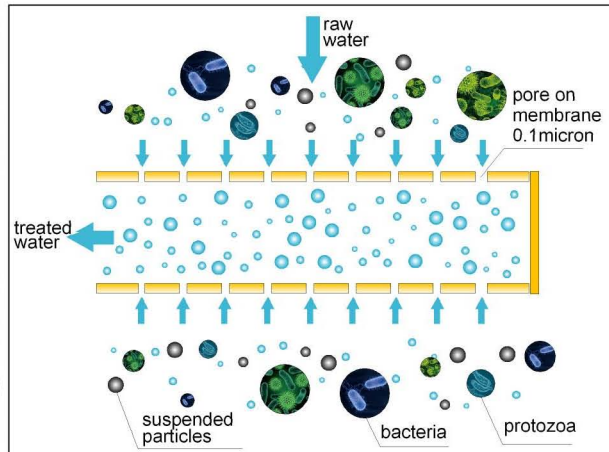

L620 down to 0.1 micron with its **two stages** filtration

**Carbon fiber** —Extremely rapid and efficient adsorption material. Strongly remove unpleasant odor and taste in water. Filtration capacity of unpleasant odor is 500Litres.

Carbon Fines is very common problem in granular activated carbon filter. Particles released from granular activated carbon filter last for its entire lifetime. Miniwell carbon fiber production technology is different from granular activated carbon. Our carbon fiber secondary contamination is not a concern. There is no carbon fines found in L620 treated water. Miniwell Carbon fiber filter avoid user ingesting black residue.

## Hollow Fiber Filtration

**0.1micron Ultrafiltration membrane (hollow fiber)** is highly efficient method of filtration requires no chemicals. It's 99.99% effective against bacteria, protozoa and cysts. The size of bacteria man known can not pass through L620 0.1micron filtration pore. Because of UF membrane physical filtration feature, there is a sign for filter replacement. Once you find water flow slow down or can not sip water through filter, it is a time to replace your filter.

Most of water filter for bottle just use activated carbon block or granular activated carbon as filter medium. Once all of the adsorption points are filled, water with bacteria still comes out. Potential risk can not be ignored.

# Water Bottle with Filter Comparison

Other Brands				miniwell L620 
Filter Media	activated carbon slight electro-positive charge	activated carbon	activated carbon	activated carbon fiber and 0.1hollow fiber
Cartridge Life	2 months or 40 gallons/150Litres	2months or 40 gallons/150 Litres	3 months or 48 gallons /180Litres	12months/ 500Litres water taste great; 1000Litres safe drinking water.
Effective Against	Chlorine, bacteria but can not last long	Chlorine	Chlorine	Chlorine, all bacteria, protozoa, even some heavy metal
Sign of Filter Replacing	No	No	No	Yes (thanks to 0.1 micron hollow filter of physical filtration)
Carbon Dust (suspended solid in treated water)	appear	appear	appear	Not appear (miniwell carbon fiber structural is stable.)

## miniwell L620 Specification

Filtration accuracy	0.1micron
Size	29*147mm
Weight	50g
Material	UF Membrane, Carbon Fiber, ABS (Food Grade)
The optimum temperature range	0°C-40°C
Filtration capacity	Make 500Litres water taste great; Ensure 1000Litres water without bacteria.

# Soft Squeeze Silicone Water Bottle

**Military Water Bottle**

**Hard-Plastic Water Bottle**

Miniwell offers a wide a range of portable water filter for people on the go. Such as highest accuracy 0.01micron pumping water filter (L610), triple usage straw water filter (L600), non-profit organization preferred water filter (L630) and new arrival fill and go water bottle with filter(L620).

Our filters are designed for fresh surface water filtration. High concentration solution could shorten filter lifespan. If you have any questions about what you may need please feel free to contact us for information and advice. We have the expertise to answer your questions and will provide you with excellent customer service.
