Performance Design Xtreme Xquisite

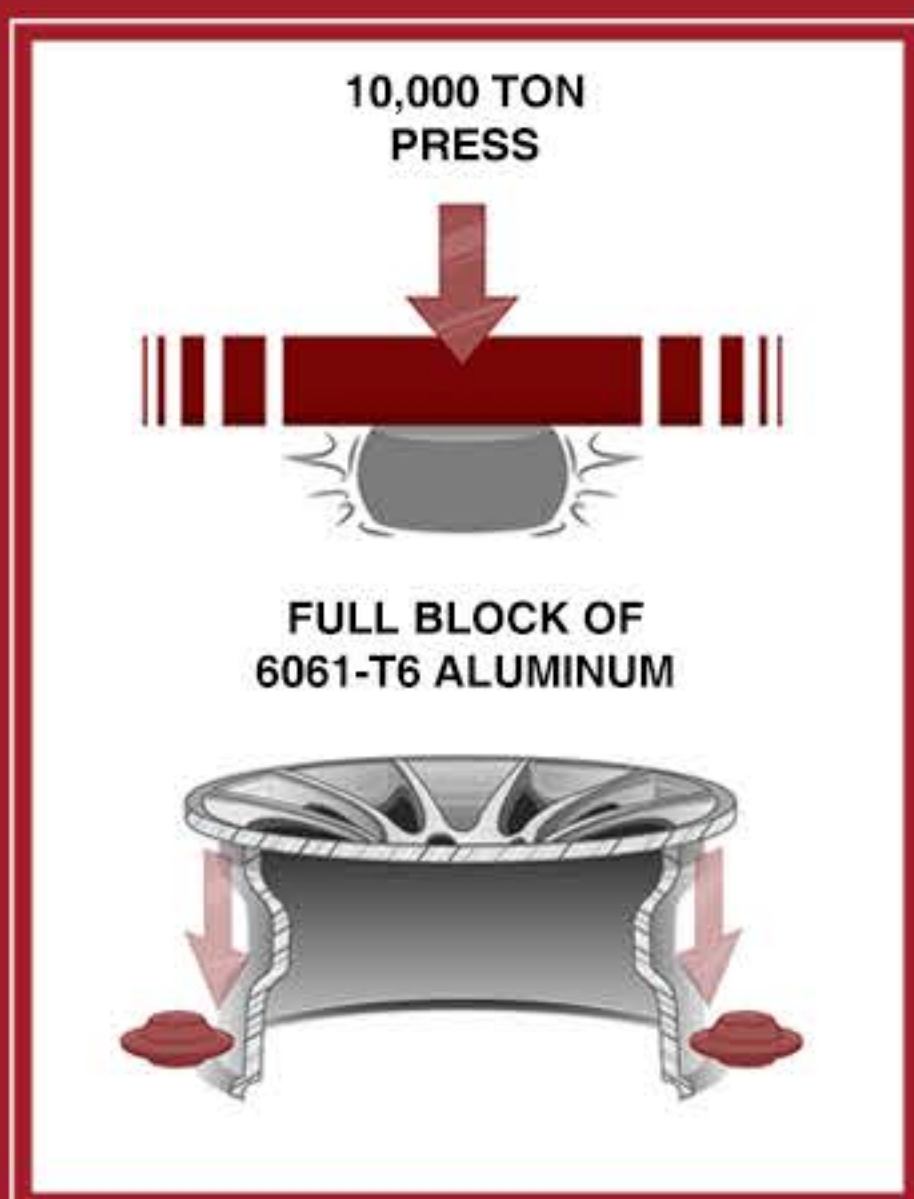

PDXX FORGED

-DESIGN, STYLE PERFORMANCE & ENGINEERING.

BEST FORGED PROCESS

All PDXX forged Wheels are Fully Forged. Machined entirely from a premium 6061-T6 Aerospace Grade Aluminum, the cylinders are formed and shaped using compressive forces to provide a basic appearance. The manufacturing process results in a stronger wheel with a tighter grain structure by eliminating cavities, porosity, and shrinkage. Mechanically stronger ensuring better wear resistance over time while achieving a desired form, weight, and strength.

CASTING

The most common manufacturing process for alloy wheels on the market starts as the molten aluminum is poured into a mold which forms the material into the desired wheel shape. The aluminum cools and then it is machined, drilled, and trimmed to perfection. It is easy and less expensive than other methods however the porosity led in the manufacturing process can lead to cracking and the overall reduction in the wheel's integrity.

CASTING FLOW FORMED (SEMI-FORGED)

An upgrade to cast wheels is a process called Flow Formed. Just like the process of other cast wheels, it adds an extra step to stretch and compress the aluminum in the barrel area of the wheel, which enhances its tensile strength and stiffness, giving it similar properties to a forged wheel in the barrel area. However, the center of the wheel is still cast and thus they are prone to have porosity.

NOT ALL FORGED WHEELS ARE CREATED EQUAL

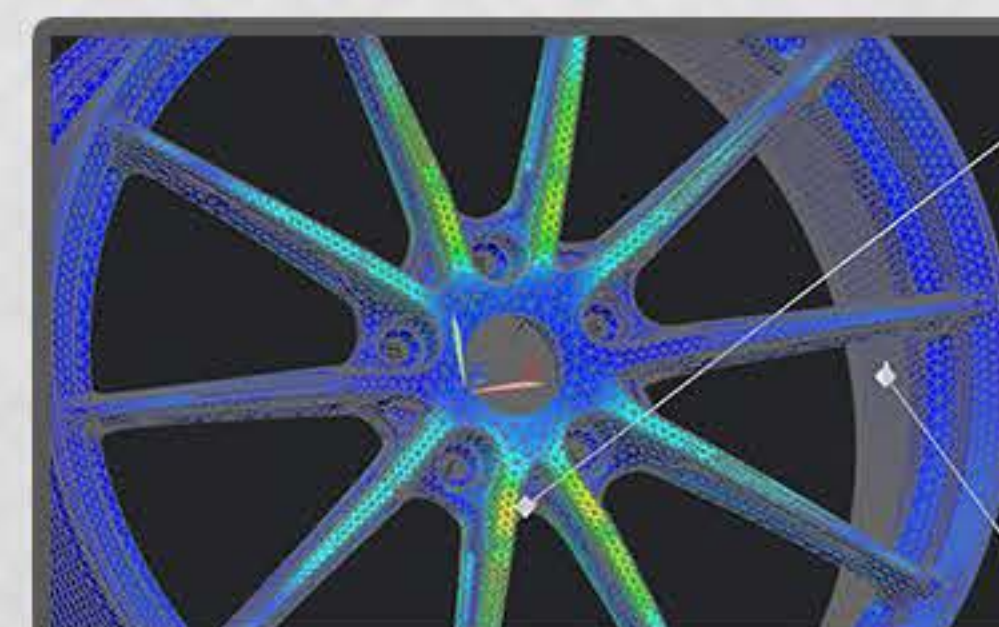

10,000 Ton Forging

PDXX Forged wheel with 10,000 ton press machine wheel formed by a Forged technology.

Aircraft Grade Aluminum

Crafted by Aerospace Grade 6061-T6 raw aluminum, PDXX forged wheels perform as expected and meet the highest quality standards.

Design Capability

Every PDXX Forged wheel is analyzed thoroughly on a 3-D simulation using CAE (Computer-Aided Engineering). All areas of the wheels are considered and tested with FEA Analysis software and tested in both laboratory and real-world conditions.

Optimized Weight Reduction

Remove weight while keeping material in critical areas to result in structurally optimized wheels with both iconic appeal and unparalleled performance.

Gear Cut Knurled Bead Seat

Feature with a gear cut knurled bead seat, All PDXX Forged wheels provide improvement in the bind that lies between the rim and the tire to prevent any tire creep/slippage while also improving traction with high performance.

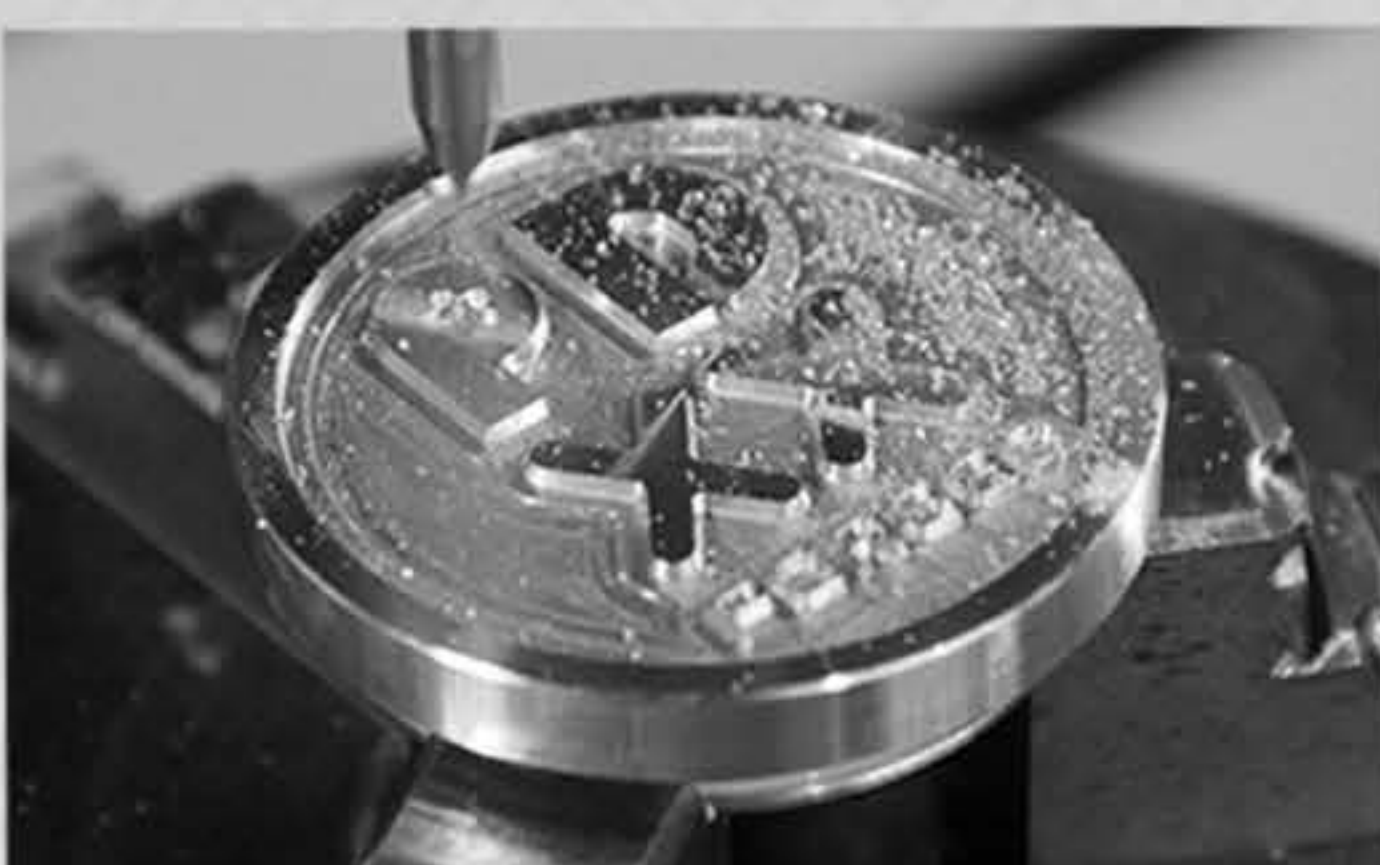

Custom Made Service

Our custom shop offers a wide range of custom designs and finishes. Our in-house production will make sure that you not only perform well but also look good with our max fitment.

FORGED CENTER CAP

The small details are what differentiates an average design from a masterpiece.

Every PDXX Forged center cap is crafted with billet aluminum, which giving it a solid, weighted feeling with perfect fitment and integration into every PDXX forged wheel.

PDXX FORGED

MONOBLOCK SERIES

GHOST BLACK

LIQUID SILVER

GHOST TITANIUM

XX-08 18" from 6.45 kg (14.1 Pounds)[^]
The lightest alloy wheel in the market!

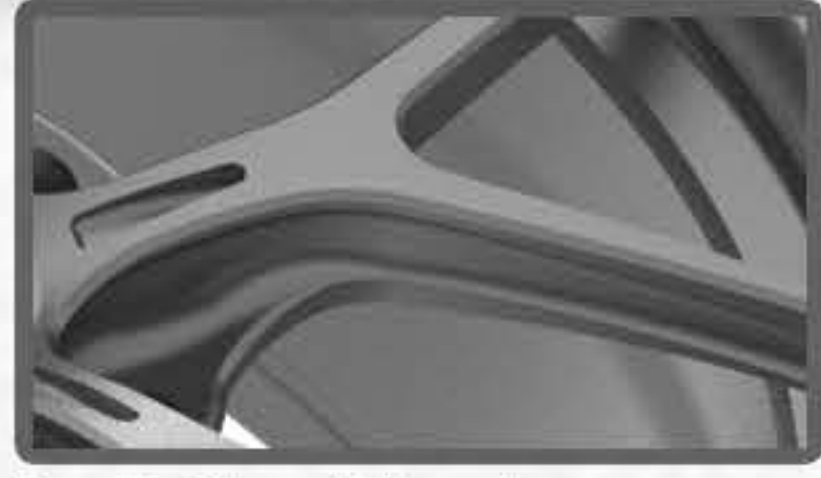

*Sample fitments are for reference only

Disk Design

This model exemplifies the qualities of a lightweight wheel and still acts as a benchmark for lightness. In addition to this high performance design, this wheel's basic properties have also been improved considerably, featuring ribs on the side faces of spokes for higher rigidity.

Radiation Dimple

The characteristic indentation and 3-dimensional curved surface are arranged in parallel at the base of the spokes. This removes grams of unnecessary weight from the wheel and increases surface area, improving head dissipation.

Super Lightweight

Improvements in strength analysis and designing technologies have enabled this slim Y-spoke design which not only excels in stress deconcentration and braking heat radiation, but also achieves lightness in the weight and styling.

GHOST BLACK

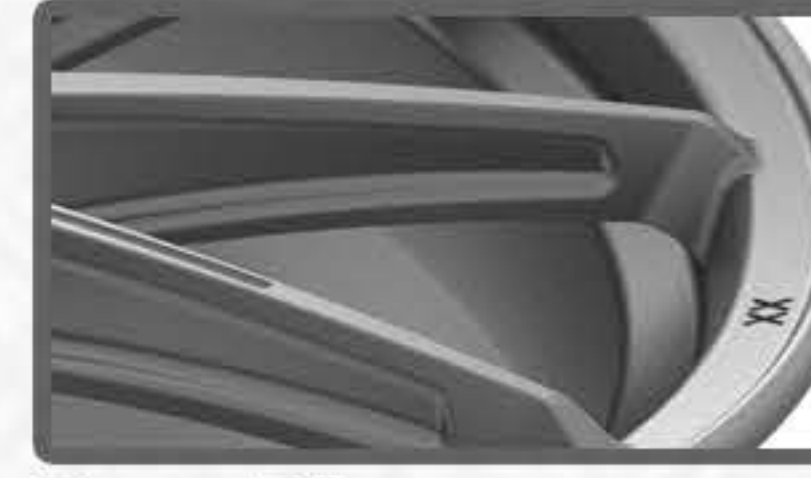

LIQUID SILVER

GHOST TITANIUM

XX-18 High performance + Powerful Styling

*Sample fitments are for reference only

Power Rib

Wheel rigidity is enhanced by a power rib, mounted to provide a ring-shaped reinforcement to the spoke-rim connections.

Long Spoke

The length of spokes is maximised to emphasise the large diameter of the wheel and make it look one-size larger than it actually is.

H-cross Spoke

Boldly scraping off the side faces of its spokes, which are less subject to stress, this wheel enables weight reduction by the gram and the formation of the H-cross spokes.

SPONSORSHIP OPEN

PDXX wheels is always looking for new, fun, and exciting projects.

Have one that you think we will love? Great at social media? Apply for a sponsorship today!

Our sponsorships will give you access to the model we want to focus on at reduced costs, or BETTER!
 Giving you an opportunity to bring your dream build to life.

Sponsor participants may be eligible for significant discounts and in some cases, free products.
 Individuals who are successful contributors to our mission will be considered for higher levels of sponsorship.

Send your car photos and your project to
 Email: PDXX@WheelsAPE.com

Find out more information about our sponsorship project visit:

PERFORMANCE

PDXX wheels are as miraculous for their Premium quality, precision engineering, and advanced materials as they are for their stunning and individually designs. Each wheel set is tailored to be the most optimal combination of lightweight forging profiles and surface milling features. The result is a wheel set designed to increase dynamic cornering response, acceleration, and decreasing overall stopping distances.

DESIGN

There is no standing still because time is moving forward, and there is always a better way to continuously evolve our collection. We never stop pushing, we are always innovating and pushing the boundaries of design, all We never stop trying to do better tomorrow than what we did today.

XTREME

PDXX Off-Road wheels has been lauched for off-road driver enthusiasts with our cutting-edge designs, fitments, and structural strength. These power wear and heavy-duty wheels are a perfect addition to your next road journey.

XQUISITE

We believe we can make a difference, not only can we create through craftsmanship in high-tech wheels but also possess an unwavering commitment to establishing high-level loyalty and quality with our customers to sustain the relationship in the long term.

10 YEARS WARRANTY

Innovative design and uncompromised quality are the hallmarks of PDXX Wheels, also combining high performance and unique aesthetics. The Pursuit for perfection in everything, the dedication to our work, and the concentration we give to quality control are what make every detail of the PDXX wheel presented. In addition, challenging and pushing the boundaries in our principle of technological innovation, the bold impression we create through craftsmanship in high-tech wheels, and caring for our customers and putting them in first place in our service guidelines, all of them make our brand stand out from the competitors. we've seen what's been offered and what you've been looking for. We create what no one else has. We're here for every driver enthusiast for the best choice to fuel your car driving experience.
