

HOW TO USE XTELARY WATCH WINDER PROPERLY?

1. The watch winder cannot wind a watch that is fully stopped. So, you need to go ahead and manually wind the timepiece to get it running. Make sure your watch is running properly before putting it in the winder.
2. Set the accurate winder mode according to your watch's Manufacturer, if not know that, TPD1000 (or Mode 4)is suitable for most automatic watches.
3. Better to stop for half a day if the watch winder keeps working for 15 days in order to maintain the motor' s life.
4. Highly recommend to use the AC adaptor instead of the battery as the power and current for the battery will be not stable due to long time use.
5. Turn off the watch winder before putting the watch inside, do not stop the rotator by manually, or it will decrease the motor' s life.

- Now it' s time to carefully place the watch in the watch winder.
- Remove the cuff and make sure that the timepiece is securely situated on the cuff.
- You will want to filp the cuff over,compress the foam and clasp the timepiece securely on the cuff.
- Next, what you want to do is put the cuff inside of the watch winder
Finally turn on the watch winder.

PREVENTIVE CARE AND MAINTENANCE

Even the vintage things can last long, so why not yours? From the beginning, you should live up believing that your watch winder will grow old with you. Having that kind of mindset makes you more inclined to doing regular healthy practices to your watch winders.

An important part of any automatic watch winder maintenance tips guide is preventive care and maintenance. Here are more awesome watch winder care tips to prevent your watch winder from any harm and to maintain it in good condition for years.

GENERAL CARE (DO'S AND DON'TS)
