Direct Recording Mode

Without WiFi (Direct Recording mode): No network connection is required. Need to insert a micro SD card (not included) before using. Keep the USB side down in case the video recorded upside down. In this mode, the camera continues to work, keeps recording and storage.

1

Insert a C10 memory card. (Format before use, chip side down, max 128G)

2

Remove the protective film on the front cover, plug it into a power socket. (Keep the cover clean)
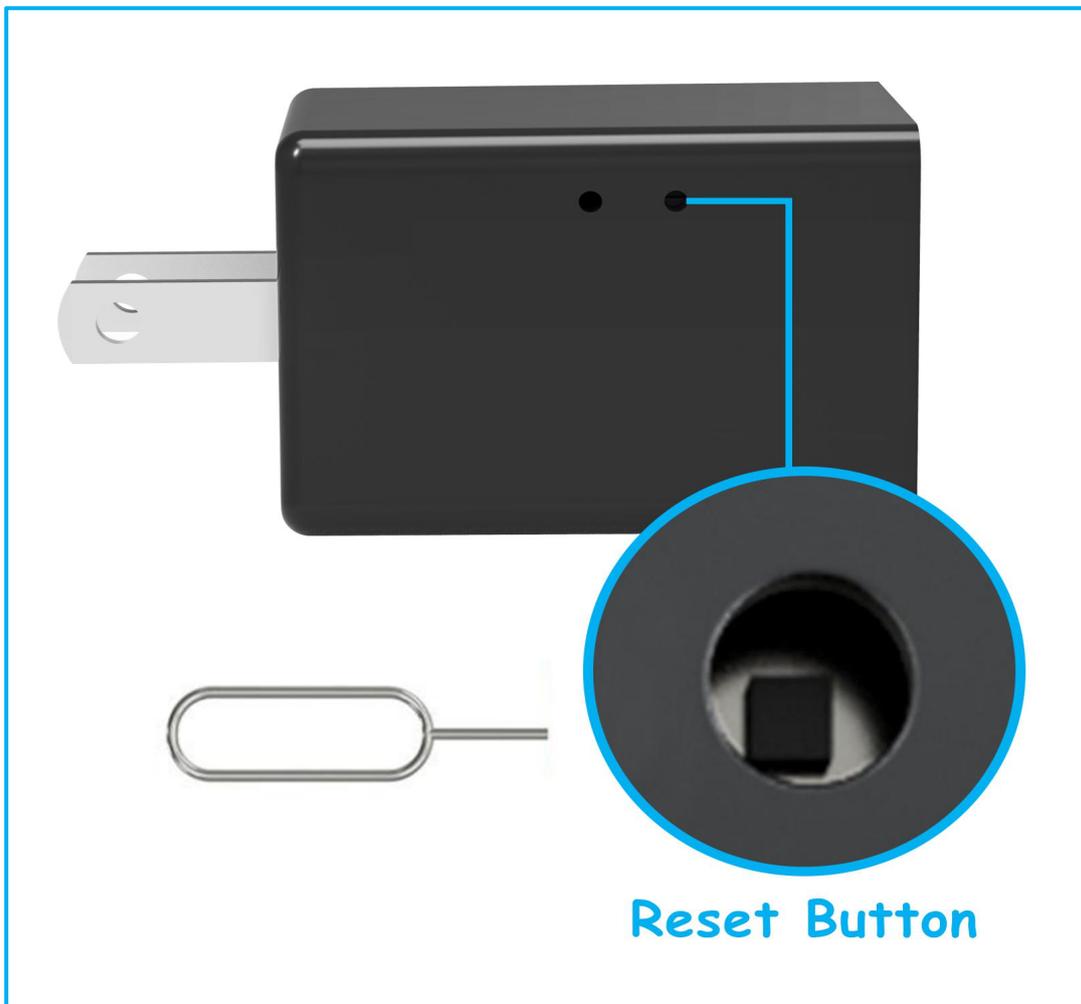

3

Take out the memory card, watch the videos. (Connect to the computer with the card reader provided)
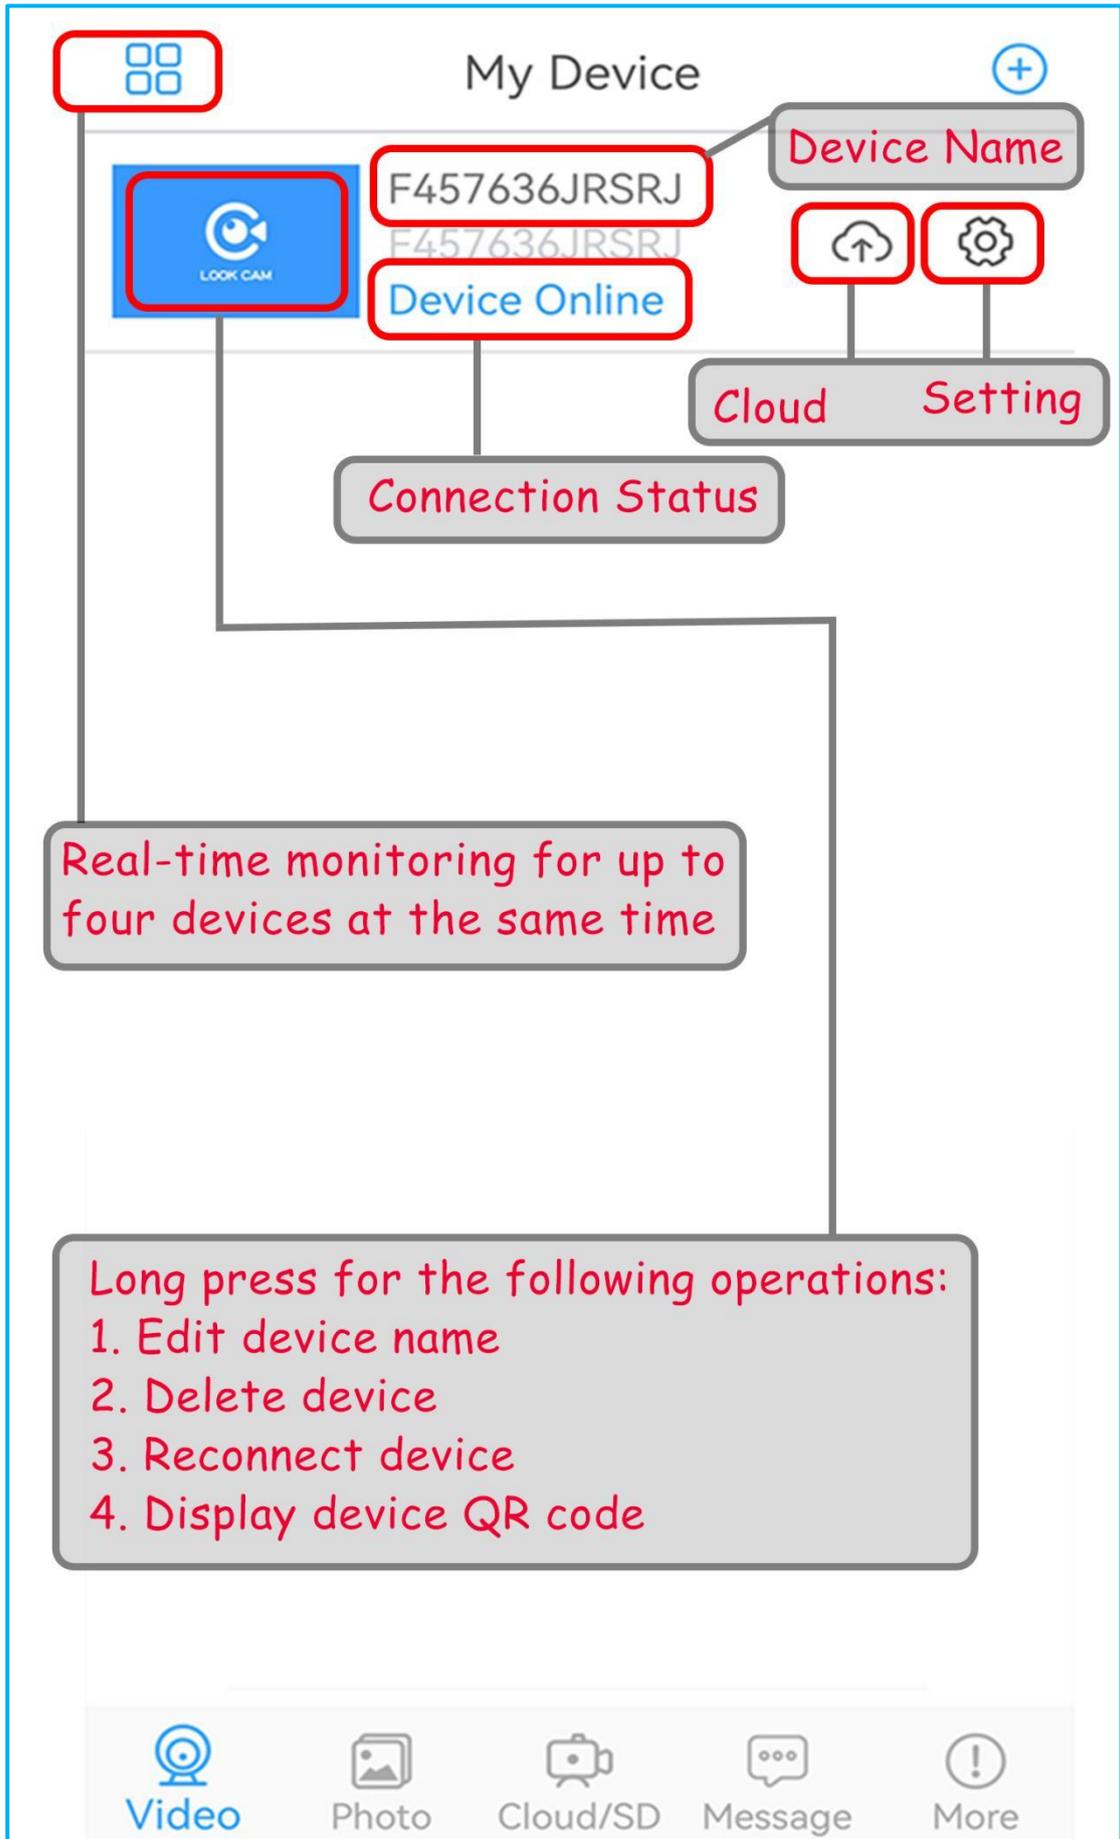

How to Reset?

Many problems can be solved by "reset":

Plug it into a power socket. After the device starts, keep pressing the "reset" button by the card pin for about 10s, till the red light is on(means restarting).

6. Questions & Answers

1. Why can't I connect to WiFi all the time?
➢ Wrong WiFi password.
➢ Don't do anything when waiting for WiFi connecting. Wait for about 30s until the blue light is on, and then click to refresh till device status shows "device online".
➢ Try "reset" the device(Page 14).

2. Why is the video playback always loading?
➢ The device-connected WiFi is slow.
➢ The device is too far away from the WiFi router.
➢ Your mobile device network is poor.

3. Do I have to set a password? What if I forget it?
➢ Set a password to protect privacy. If you set a password of your own, when others connect to the device, they need to enter the password to access real-time monitoring.
➢ If you forget your password, try "reset" the device and set a new one. The default password is 123456.

4. Why is my video blurry?
➢ Remove the protective film on the front cover and keep the cover clean.

5. How to turn off the indicator light on the device?
➢ By clicking the indicator logo on the view page to turn on/off the indicator lights on the device.

6. Why is there always noise?

➢ This is because your mobile phone is too close to the device, and the electro interacts with each other. As long as you keep 15ft from the device, the noise will disappear.

7. Why is there no alarm notification?

➢ Make sure your app notification is permitted.
➢ Make sure you have turned on the alarm mode.
➢ Check your "message" page and refresh for alarm messages.
➢ If you want to see the alarm picture, you need to pay for this service(cloud page, $1 forever valid for alarm pictures.)

8. Why can't I drag the progress bar in my playback video?

➢ You need to download the video to do that.

9. How to share my device with others?

➢ Details on Page 10 > "Step 5. Share your device".

10. How to change to another WiFi?

➢ By clicking "Device Setting > WiFi Setting", choose the WiFi you want to select from the WiFi list.

11 . Why does my memory card not save the video?

➢ Make sure your SD card(Max 128GB) is Class 10 or above.
➢ Make sure to insert/take out the card when the device is unplugged.
➢ Make sure to format the memory card before use.

12. Why is the video saved in the memory card not

displayed in the app?
- ➢ Select your device with the memory card through the upper right corner, and then wipe to refresh the page.

13. If my WiFi is hidden, how can I connect?
- ➢ Click any WiFi in the list, manually modify its name to your WiFi name, enter the WiFi password.

14. What if I encounter another problem?
- ➢ If your device is not working, try resetting the device (by pressing the reset button on page 14 or clicking "Device Setting > Reset Factory").
- ➢ If the reset can not solve your problem, please get in touch with our professional customer service team (Page 12). We will reply to you within 24 hours.

💬The logic of the network connection:

> Start up the device first.
>> Connect the device hotspot, let the device recognize your mobile phone.
>>> Connect the device to WiFi through the APP(WiFi fast, no delay; WiFi or mobile phone data slow, delay or keep loading.)
>>>> Set a password to prevent others from accessing your device.
- 🔖 So if you need to use the device elsewhere, you need to reset the device and connect to the new WiFi.
