## VIA WEB INTERFACE – Instruction on How to Add Devices

## VIA Autoloading Device

Open the following link with Google Chrome https://via.evove.top

In the CONFIGURE interface, please load the device per the order denoted in the picture below. You can also load the json file manually if the autoloading process fails.

## VIA Manually-Loading Device

Step 1.

Open the following link with Google Chrome <a href="https://usevia.app/#/design">https://usevia.app/#/design</a>

Step 2. Click the interface below to load the json file

	CONFIGURE KEY TESTER	DESIGN SETTI	NGS	
L				
Load Draft Definition				Load
Use V3 definitions (via/next)				
Draft Definitions				

## Step 3.

Connect the keyboard to the computer, the following dialog box shall pop up after loading the json file. Click "connect" and then the corresponding keyboard configuration interface shall appear.

✓ VIA	× +						×	-	13	×
e > c	usevia.app/#/design					8	\$	* [	1 8	1
M Gmall 😐	usevia.app 想许接到 HID 设备									
	MonsGeek Keyboard		DESIGN							
	100									
	0	意識 取算								
					Load					
				MonsGeek Keyh						
	Show Matrix									

If Step 3 fails, you can also load the corresponding configuration in the CONFIGURE interface.
