

Smart WiFi Plug

User Manual

WORKS WITH
Google Assistant

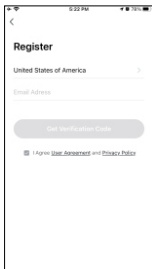

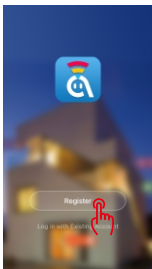

WORKS WITH
amazon alexa

Install APP & Add Device

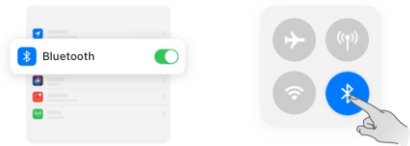

Step 1: Download the “AvatarControls” APP and keep your phone connected to 2.4G WiFi (5G is not supported).

Step 2: Register an account in AvatarControls APP

Step 3: Enable your smartphone's Bluetooth

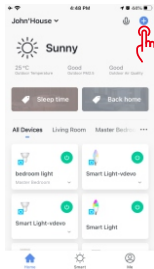

Step 4: Hold down the smart plug's power button 5 seconds until the LED indicator is blinking.

Step 5: Open AvatarControls APP, tap “+” icon to add devices, then a reminder to add discovered devices will automatically pop up, you just follow the in-APP instruction to connect the Smart Plug to your Wi-Fi network.

Any questions? tap here

How to work with Amazon Echo or Google Home?

- 1 Tap the “✎” icon of the smart plug main panel
- 2 Tap the 3rd-party control icon to be operated
- 3 Sign in with your Amazon Alexa or Google Home account.

Now, you can call Alexa or Google voice control your named device,
“Alexa/Hey Google, turn on smart plug”
“Alexa/Hey Google, turn off the fan”
