USER 'S MANUAL

Model:BBW-9500D

Chef Handly

Thank you for choosing our product

In order to use this product well, please be sure to read the instruction manual carefully and keep the instruction manual properly. The pictures in this manual are for reference only, the product is subject to the actual product.

Precautions for Use

1. Please read the manual carefully before using this product.
2. In order to avoid moisture and leakage, please do not put the machine into water for cleaning.
3. Do not place the product in the place accessible to infants and children; please unplug the power supply if it is not used for a long time.
4. If the power cord is damaged, in order to avoid risks, it must be replaced by the manufacturer, its maintenance department or professionals in similar departments.
5. Do not pour milk and food directly into the milk warmer for heating.
6. Before feeding, please drop the milk on the hand bowl to check the temperature; pay attention to the food heating time should not be too long, so as not to damage the food nutrition.
7. When the product is used in the early stage, slight plastic smell is easy to appear after high temperature, which is a normal phenomenon
8. This appliance can be used by children aged from 8 years and above and persons with reduced physical, sensory or mental capabilities or lack of experience and knowledge if they have been given supervision or instruction concerning use of the appliance in a safe way and understand the hazards involved. Children shall not play with the appliance. Cleaning and user maintenance shall not be made by children without supervision.

Warm Tips	For a better user experience and later maintenance, please use a wet tissue to wipe the inside and outside of the machine for the first time when starting to use the new machine. Please clean the baby bottle basket and cover with water. Fill the scale with water in the bottle warmer and then choose the "Sterilize" mode runs once. At this time, it can check whether the machine is in good condition or not. After the operation, pour out the internal water of the bottle warmer for ventilation and drying and then it can be used normally next time.
-----------	--

Cleaning and Maintenance

1. When cleaning, please unplug the power plug and wait for the heating plate to cool to room temperature before cleaning.
2. Do not scratch the heating plate with metal sharp objects.
3. Due to the different water quality of the tap water, when the heating plate is used for a period of time and the scale is accumulated. Appropriate amount of vinegar or citric acid can be used to add appropriate amount of water into the bottle warmer. Choose the "Sterilize" function to boil the water and clean it.

Daily Cleaning Method

1. Daily cleaning is recommended once every 10-15 days.
2. After the bottle basket and cover are cleaned with water, place them for ventilation.

Long-term Maintenance Requirements

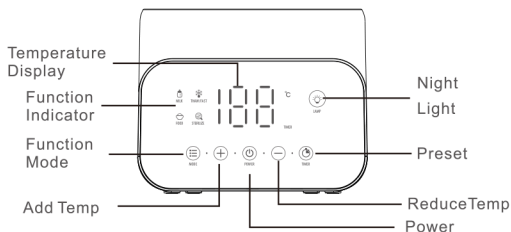

1. It is recommended to pour a certain amount of cleaning detergent (vinegar, citric acid, etc.) into the water tank every two months after the normal use of the bottle warmer and soak it for more than 10 minutes, and then rinse it with clear water.
