

## Installation & Maintenance For Glass, Stone, Concrete, and Stainless-Steel Basins

--Recommended 50-60mm waste hole to be cut onto the benchtop for all glass basins

--Avoid direct contact or extreme hot water as it may cause damage or crack

--Don't use abrasive cleaner such as Ajax or Jif, clean daily with warm water and a damp cloth is usually all you need

--Don't leave spills or metal objects as it may lead to discoloring and stains
